The New Teacher Revolution Josh Stumpenhorst,2015-02-09 For 21st Century Educators The New Rules Of Student Engagement It s time to throw out the old rulebook Today s classroom demands teacher innovation embracing of new technology and rejection of outdated practices especially when someone tells you it s always been done a certain way Meet Josh Stumpenhorst recently named Illinois Teacher of the Year Stumpenhorst s orthodoxy challenging methods have produced outstanding student outcomes and in these pages he details how to maximize teacher effectiveness by thinking outside the box Build student relationships on trust and respect rather than fear and punishment Rethink homework and letter grades which in their current forms are harming learning Leverage technology by not treating it as a shiny toy but rather understand its power as a tool for rapid progress Educators who welcome large scale change are about to pull ahead of those who don t Josh Stumpenhorst is an all star teacher And the advice he provides for his colleagues comes from his own authentic experience in the classroom and from a place of deep respect for students and learning For new teachers in search of mentoring this book is the place to start Daniel H Pink Author The dynamic changes in society have fundamentally altered our learners resulting in a system that no longer

meets their needs Josh Stumpenhorst not only provides a plan to right the ship but backs it up by including numerous strategies that have been successfully implemented Eric Sheninger Author and Award Winning Principal Josh clarifies the goals most salient to the teaching profession while providing solutions to entrenched challenges Any teacher new or veteran will rethink their classroom after reading this book Angela Maiers Educator and Author **CAA2015. Keep The Revolution Going** Stefano Campana,Roberto Scopigno,Gabriella Carpentiero,2016-03-31 This volume brings together all the successful peer reviewed papers submitted for the proceedings of the 43rd conference on Computer Applications and Quantitative Methods in Archaeology that took place in Siena Italy from March 31st to April 2nd 2015 **Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution** Ratri Wulandari,Idhar Resmadi,Vika Harisianti,Rahmiati Aulia,Riky Taufik Afif,Gema Ari Prahara,Aulia Ibrahim Yeru,2021-08-25 The 7th Bandung Creative Movement conference presented the theme Dynamics of Industrial Revolution 4 0 which discussed how the digital world and connectivity changed human culture in various aspects of life and transformed in accordance to human needs and social culture Digital technology has transformed society to serve people from manufacturing needs to smart cities from network connectivity to people connectivity The application of information technology has helped in improving live quality and environmental sustainability Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient The result is improved collaboration faster processes and time to market lower costs and better products Devices are getting smarter meaning they are able to perform more and more tasks without human intervention moreover these devices generate data that provide insights to further improve processes and gain greater efficiencies Moreover with the Internet of Things IoT all these smart devices are interconnected in ways that not only help make them even smarter but also enhances the intelligence of the overall system Digital technology is a formidable driver for the transformation of a highly carbon dependent world into one that is more ecologically smart We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals Since its first announcement in 2011 industrial revolution 4 0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement The 7th Bandung Creative Movement has brought forward discussions on dynamic changes ups and downs innovations relations of industrial revolution of the internet of thing data automation to human physical world new art and aesthetic business product innovation built environment and education **The Laparoscopic Surgery Revolution** David W. Page MD,2017-02-13 Written by a surgeon with 40 years experience in practice and instruction this book provides vital up to date information that explains the strengths and weaknesses of the laparoscopic surgery field to enable potential surgical patients to make the best decisions and choose a surgeon wisely More than 30 years ago laparoscopic or keyhole surgery suddenly appeared as an operative technique Laparoscopy quickly grew in the U S surgical field where now more than two million operations annually

use the technique But is the training surgeons receive in laparoscopy sufficient to ensure patient safety What are the specific situations where laparoscopy is beneficial and justified and when is it ill advised due to the additional complexity and risk factors This is the first book written for general readers avoiding medical jargon wherever possible to expose the gritty history and downsides of minimally invasive surgery Additionally it provides the perspective and insights of an esteemed surgeon who was working at the inception of laparoscopy and has a full understanding of this now widely popular procedure across its development and lifespan Readers will learn about the emergence of laparoscopic techniques in the 1990s understand how minimally invasive surgery has been a boon to the business of surgery and to patient health and recovery overall appreciate how the complexity involved in laparoscopic surgery has led to a higher incidence of surgeon incompetence and grasp the responsibility of a patient to take steps to assure that the surgeon is qualified before going into the operating room Examination of eye opening statistics on the outcomes of laparoscopic procedures documents the high level of capability of most surgeons as well as the lack of appropriate ability with certain laparoscopic operations in the hands of some surgeons The author also spells out how informed patients can be prepared to discuss and consider all aspects of an operation and the surgeon s training and experience to assure the best outcome for their health

Sustainable Agriculture in the Era of the OMICs Revolution Channa S. Prakash,Sajid Fiaz,Muhammad Azhar Nadeem,Faheem Shehzad Baloch,Abdul Qayyum,2023-01-01 Access to food with enough calories and nutrients is a fundamental right of every human The global population has exceeded 7 8 billion and is expected to pass 10 billion by 2055 Such rapid population increase presents a great challenge for food supply More grain production is needed to provide basic calories for humans Thus it is crucial to produce 60 110% more food to fill the gap between food production and the demand of future generations Meanwhile food nutritional values are of increasing interest to accommodate industrialized modern lives The instability of food production caused by global climate change presents another great challenge The global warming rate has become more rapid in recent decades with more frequent extreme climate change including higher temperatures drought and floods Our world faces various unprecedented scenarios such as rising temperatures which causes melting glaciers and the resulting various biotic and abiotic stresses ultimately leading to food scarcity In these circumstances it is of utmost importance to examine the genetic basis and extensive utilization of germplasm to develop climate resilient cultivars through the application of plant breeding and biotechnological tools Future crops must adapt to these new and unpredictable environments Crop varieties resistant to biotic and abiotic stresses are also needed as plant disease insects drought high and low temperature stresses are expected to be impacted by climate change Thus we need a food production system that can simultaneously satisfy societal demands and long term development Since the Green Revolution in the 1960s farming has been heavily dependent on high input of nitrogen and pesticides This leads to environmental pollution which is not sustainable in the long run Therefore a new breeding scheme is urgently needed to enable sustainable agriculture including new strategies to develop

varieties and crops that have high yield potential high yield stability and superior grain quality and nutrition while also using less consumption of water fertilizer and chemicals in light of environmental protection While we face these challenges we also have great opportunities especially with flourishing developments in omics technologies High quality reference genomes are becoming available for a larger number of species with some species having more than one reference genome The genome wide re sequencing of diverse varieties enables the identification of core and pan genomes An integration of omics data will enable a rapid and high throughput identification of many genes simultaneously for a relevant trait This will change our current research paradigm fundamentally from single gene analysis to pathway or network analysis This will also expand our understanding of crop domestication and improvement In addition with the knowledge gained from omics data in combination with new technologies like targeted gene editing we can breed new varieties and crops for sustainable agriculture

Africa's Gene Revolution Matthew A. Schnurr,2019-11-07 As development donors invest hundreds of millions of dollars into improved crops designed to alleviate poverty and hunger Africa has emerged as the final frontier in the global debate over agricultural biotechnology The first data driven assessment of the ecological social and political factors that shape our understanding of genetic modification Africa s Gene Revolution surveys twenty years of efforts to use genomics based breeding to enhance yields and livelihoods for African farmers Matthew Schnurr considers the full range of biotechnologies currently in commercial use and those in development including hybrids marker assisted breeding tissue culture and genetic engineering Drawing on interviews with biotechnology experts alongside research conducted with more than two hundred farmers across eastern western and southern Africa Schnurr reveals a profound incongruity between the optimistic rhetoric that accompanies genetic modification technology and the realities of the smallholder farmers who are its intended beneficiaries Through the lens of political ecology this book demonstrates that the current emphasis on improved seeds discounts the geographic social ecological and economic contexts in which the producers of these crops operate Bringing the voices of farmers to the foreground of this polarizing debate Africa s Gene Revolution contends that meaningful change will come from a reconfiguration not only of the plant s genome but of the entire agricultural system
