Gas Furnaces
RGPQ Series

Rheem Classic® Series Two-Stage Upflow/Horizontal Gas Furnaces

RGPQ- Series

80% A.F.U.E.†

Models with Input Rates from
45-105 kBTU
(U.S. & Canadian Models)

†A.F.U.E. (Annual Fuel Utilization Efficiency) calculated in accordance with Department of Energy test procedures.

- The Rheem Classic® Series 2-Stage line of upflow/horizontal gas furnaces are designed for utility rooms, closets, alcoves, or attics. **Because of the low-profile 34 inch [864 mm] height, the upflow model can also be used to satisfy most applications that traditionally call for a horizontal furnace.**
- The design is certified by CSA International.
- Patented heat exchanger, constructed of aluminized steel for the maximum in corrosion resistance and thermal fatigue reliability.
- Low profile "34 inch" design is lighter and easier to handle, and leaves room for optional equipment.
- Convertible from upflow to horizontal left or right without field conversion.
- Left or right side gas and electric inlet connections with quick, simple change.
- Direct spark ignition models equipped with remote sense and feature an integrated board with humidifier and electronic air cleaner hookups.
- Insulated blower compartment, a two stage gas valve and a specially designed two-speed draft inducer motor make it one of the quietest furnaces on the market today.
- Pre-paint galvanized steel cabinet.
- Molded permanent filter.
- Grab-holes in doors to aid in easy door removal and replacement.
- Compatible with single or two-stage thermostat. (For optimal performance two-stage thermostat recommended.)
- A variety of cooling coils and plenums designed to use with Rheem Classic® Series 2-Stage gas furnaces are available as optional accessories.
- Furnaces can be installed in an upflow position or laid on either side in a horizontal position. Field conversion not required.
