on three major topics The Life of the Human Soul Spiritual Striving in Relation to Earth's Evolution and The Contrast Between East and West The common theme however is our mutual responsibility for what the human being and the world will eventually become which according to Steiner is far from a foregone conclusion Even the way we think can change and affect the future the degree for example to which we concentrate our picturing in meditation infusing head thinking with warmth of heart Rudolf Steiner reveals a hugely complex picture of interrelationships between humanity and the cosmos Our head heart lungs and limbs all reveal subtly different qualities of connection with the invisible realities that continue to sustain us Our eyes for instance only gradually evolved into organs of sight and were once vital organs as our lungs are now The lungs in turn will similarly evolve to provide us with another form of perception As is usually the case Steiner addresses a wide variety of topics in addition to those above Included in this volume are thoughts on the significance of the cinema the nature of the halo technology as the true foundation of the modern worldview asceticism in the Middle Ages the world of machines and the world of rite and worship yoga and modern meditation exercises pain as an awakener of knowledge the emergence of the belief in ghosts and the connection between stomach acid and soul qualities
