An Environmental History of the World J. Donald Hughes, 2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history 

Aztec Latin Andrew Laird, 2024 In 1536 only fifteen years after the fall of the Aztec empire Franciscan missionaries began teaching Latin classical rhetoric and Aristotelian philosophy to native youths in central Mexico The remarkable linguistic and cultural exchanges that would result from that initiative are the subject of this book

Aztec Latin highlights the importance of Renaissance humanist education for early colonial indigenous history showing how practices central to humanism the cultivation of eloquence the training of leaders scholarly translation and antiquarian research were transformed in New Spain to serve Indian elites as well as the Spanish authorities and religious orders While Franciscan friars inspired by Erasmus ideal of a common tongue applied principles of Latin grammar to Amerindian languages native scholars translated the Gospels a range of devotional literature and even Aesop s fables into the Mexican language of Nahuatl They also produced significant new writings in Latin and Nahuatl adorning accounts of their ancestral past with parallels from Greek and Roman history and importing themes from classical and Christian sources to interpret pre Hispanic customs and beliefs Aztec Latin reveals the full extent to which the first Mexican authors mastered and made use of European learning and provides a timely reassessment of what those indigenous authors really achieved Trudy Ring, Noelle Watson, Paul Schellinger, 2013-11-05 This five volume set presents some 1 000 comprehensive and fully illustrated histories of the most famous sites in the world Entries include location description and site details and a 3 000 to 4 000 word essay that provides a full history of the site and its condition today An annotated further reading list of books and articles about the site completes each entry The geographically organized volumes include Volume 1 The Americas 1 884964 00 1 Volume 2 Northern Europe 1 884964 01 X Volume 3 Southern Europe 1 884964 02 8 Volume 4 Middle East Africa 1 884964 03 6 Volume 5 Asia Oceania 1 884964 04 4 Classic Maya Political Ecology Jon C. Lohse, 2013-12-31 Data spanning the Archaic to Early Postclassic are presented with particular analytical focus given to the end of the Early Classic through the Late and Terminal Classic and the geopolitical tumult that defined this period Cast in the framework of political ecology together these studies not only shed light on specific class histories of the region They also advance a theory for understanding the contributions of non elites to political growth and change over time Classic Maya Political Ecology opens a window into pre Columbian political processes grounded in environmental productivity and a mutual interdependence that defined class relations in northwestern Belize This volume also outlines a theoretical approach that defines commoners and elites alike as political actors people who contributed to the long term success and adaptability of local and regional political communities and the networks that sustained them *Lightning Gods and Feathered Serpents* Rex Koontz, 2010-01-01 El Taj n an ancient Mesoamerican capital in Veracruz Mexico has long been admired for its stunning pyramids and ballcourts decorated with extensive sculptural programs Yet the city's singularity as the only center in the region with such a wealth of sculpture and fine architecture has hindered attempts to place it more firmly in the context of Mesoamerican history In Lightning Gods and Feathered Serpents Rex Koontz undertakes the first extensive treatment of El Taj n s iconography in over thirty years allowing us to view its imagery in the broader Mesoamerican context of rising capitals and new elites during a period of fundamental historical transformations Koontz focuses on three major architectural features the Pyramid of the Niches Central Plaza ensemble the South Ballcourt and the Mound of the Building Columns complex and investigates the

meanings of their sculpture and how these meanings would have been experienced by specific audiences Koontz finds that the iconography of El Taj n reveals much about how motifs and elite rites growing out of the Classic period were transmitted to later Mesoamerican peoples as the cultures centered on Teotihuacan and the Maya became the myriad city states of the Early Postclassic period By reexamining the iconography of sculptures long in the record as well as introducing important new monuments and contexts Lightning Gods and Feathered Serpents clearly demonstrates El Taj n s numerous iconographic connections with other areas of Mesoamerica while also exploring its roots in an indigenous Gulf lowlands culture whose outlines are only now emerging At the same time it begins to uncover a largely ignored regional artistic culture of which Taj n is the crowning achievement The Collapse of Complex Societies Joseph Tainter, 1988 Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations He then develops a new and far reaching theory A Companion to Mexican History and Culture William H. Beezley, 2011-03-16 A Companion to Mexican History and Culture features 40 essays contributed by international scholars that incorporate ethnic gender environmental and cultural studies to reveal a richer portrait of the Mexican experience from the earliest peoples to the present Features the latest scholarship on Mexican history and culture by an array of international scholars Essays are separated into sections on the four major chronological eras Discusses recent historical interpretations with critical historiographical sources and is enriched by cultural analysis ethnic and gender studies and visual evidence The first volume to incorporate a discussion of popular music in political analysis This book is the receipient of the 2013 Michael C Meyer Special Recognition Award from the Rocky Mountain Conference on Latin American Studies Encyclopedia of the Ancient Maya Walter R. T. Witschey, 2015-12-24 Encyclopedia of the Ancient Maya offers an A to Z overview of the ancient Maya culture from its inception around 3000 BC to the Spanish Conquest after AD 1600 Over two hundred entries written by more than sixty researchers explore subjects ranging from food clothing and shelter to the sophisticated calendar and now deciphered Maya writing system They bring special attention to environmental concerns and climate variation fresh understandings of shifting power dynamics and dynasties and the revelations from emerging field techniques such as LiDAR remote sensing and newly explored sites such as La Corona Tamchen and Yaxnohkah This one volume reference is an essential companion for students studying ancient civilizations as well as a perfect resource for those planning to visit the Maya area Cross referencing topical and alphabetical lists of entries and a comprehensive index help readers find relevant details Suggestions for further reading conclude each entry while sidebars profile historical figures who have shaped Maya research Maps highlight terrain archaeological sites language distribution and more over fifty photographs complement the volume The Routledge Handbook to the History and Society of the Americas Olaf Kaltmeier, Josef Raab, Mike Foley, Alice Nash, Stefan Rinke, Mario Rufer, 2019-04-12 The colonial heritage and its renewed aftermaths expressed in the inter American experiences of slavery indigeneity dependence and freedom movements to mention only a few aspects form a

common ground of experience in the Western Hemisphere The flow of peoples goods knowledge and finances have promoted interdependence and integration that cut across borders and link the countries of North and South America together The nature of this transversally related and multiply interconnected region can only be captured through a transnational multidisciplinary and comprehensive approach The Routledge Handbook to the History and Society of the Americas explores the history and society of the Americas placing particular emphasis on collective and intertwined experiences Forty four chapters cover a range of concepts and dynamics in the Americas from the colonial period until the present century The shared histories and dynamics of Inter American relationships are considered through pre Hispanic empires colonization European hegemony migration multiculturalism and political and economic interdependences Key concepts are selected and explored from different geopolitical disciplinary and epistemological perspectives Highlighting the contested character of key concepts that are usually defined in strict disciplinary terms the Handbook provides the basis for a better and deeper understanding of inter American entanglements This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history sociology political science cultural postcolonial gender literary and globalization Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 studies **Twin Tollans** Cynthia Kristan-Graham, 2007 This volume had its beginnings in the two day colloquium Rethinking Chich n Itz Tula and Tollan that was held at Dumbarton Oaks The selected essays revisit long standing questions regarding the nature of the relationship between Chichen Itza and Tula Rather than approaching these questions through the notions of migrations and conquests these essays place the cities in the context of the emerging social political and economic relationships that took shape during the transition from the Epiclassic period in Central Mexico the Terminal Classic period in the Maya region and the succeeding Early Postclassic period The Anasazi in a Changing Environment George J. Gumerman, 1988-10-27 An outline of a 1000 year chronicle of environmental and cultural history which attempts to explain broad patterns of interaction between humans and their environment It uses North American geological and botanical remains and looks at the behaviour The Origins of Maya States Loa P. Traxler, Robert J. Sharer, 2016-10-28 The of the Anasazi prehistoric Pueblo Indians Pre Columbian Maya were organized into a series of independent kingdoms or polities rather than unified into a single state The vast majority of studies of Maya states focus on the apogee of their development in the classic period ca 250 850 C E As a result Maya states are defined according to the specific political structures that characterized classic period lowland Maya society The Origins of Maya States is the first study in over 30 years to examine the origins and development of these states specifically during the preceding preclassic period ca 1000 B C E to 250 C E Attempts to understand the origins of Maya states cannot escape the limitations of archaeological data and this is complicated by both the variability of Maya states in time and space and the interplay between internal development and external impacts To mitigate these factors editors Loa P Traxler and Robert J Sharer assemble a collection of essays that combines an examination of topical issues with regional

perspectives from both the Maya area and neighboring Mesoamerican regions to highlight the role of interregional interaction in the evolution of Maya states Topics covered include material signatures for the development of Maya states evaluations of extant models for the emergence of Maya states and advancement of new models based on recent archaeological data Contributors address the development of complexity during the preclassic era within the Maya regions of the Pacific coast highlands and lowlands and explore preclassic economic social political and ideological systems that provide a developmental context for the origins of Maya states Contributors Marcello A Canuto John E Clark Ann Cyphers Francisco Estrada Belli David C Grove Norman Hammond Richard D Hansen Eleanor King Michael Love Simon Martin Astrid Runggaldier Robert Sharer Loa Traxler Field Methods in Archaeology Thomas R Hester, Harry J Shafer, Kenneth L Feder, 2016-09-16 Field Methods in Archaeology has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary Robert Heizer Left Coast has arranged to put the most recent Seventh Edition back into print after a brief hiatus making this classic textbook again available to the next generation of archaeology students This comprehensive guide provides an authoritative overview of the variety of methods used in field archaeology from research design to survey and excavation strategies to conservation of artifacts and record keeping Authored by three leading archaeologists with specialized contributions by several other experts this volume deals with current issues such as cultural resource management relations with indigenous peoples and database management as well as standard methods of archaeological data collection and analysis The Great Maya Droughts Richardson B. Gill, 2001-04-01 This innovative study argues that the collapse of Classic Maya civilization was driven by catastrophic drought Between A D 800 and 1000 unrelenting drought killed millions of Maya people with famine and thirst and initiated a cascade of internal collapses that destroyed their civilization Linking global regional and local climate change the author explores how atmospheric processes volcanism ocean currents and other natural forces combined to create the dry climate that pried apart the highly complex civilization in the tropical Maya Lowlands in the ninth and tenth centuries Drawing on knowledge of other prehistoric and historic droughts The Great Maya Droughts is a useful study of the relationship of humans to their natural and physical environment The author tries to understand why the Classic Maya failed to adjust their behavior and culture to the climatic conditions and why civilizations in general sometimes collapse in the face **Ritual and Power in Stone** Julia Guernsey, 2010-01-01 The ancient Mesoamerican city of radical environmental change of Izapa in Chiapas Mexico is renowned for its extensive collection of elaborate stone stelae and altars which were carved during the Late Preclassic period 300 BC AD 250 Many of these monuments depict kings garbed in the costume and persona of a bird a well known avian deity who had great significance for the Maya and other cultures in adjacent regions This Izapan style of carving and kingly representation appears at numerous sites across the Pacific slope and piedmont of Mexico and Guatemala making it possible to trace political and economic corridors of communication during the Late Preclassic period In this book Julia Guernsey offers a masterful art historical analysis of the Izapan style monuments and their integral role in developing and communicating the institution of divine kingship She looks specifically at how rulers expressed political authority by erecting monuments that recorded their performance of rituals in which they communicated with the supernatural realm in the persona of the avian deity She also considers how rulers used the monuments to structure their built environment and create spaces for ritual and politically charged performances Setting her discussion in a broader context Guernsey also considers how the Izapan style monuments helped to motivate and structure some of the dramatic pan regional developments of the Late Preclassic period including the forging of a codified language of divine kingship This pioneering investigation which links monumental art to the matrices of political economic and supernatural exchange offers an important new understanding of a region time period and group of monuments that played a key role in the history of Mesoamerica and continue to intrigue scholars within the field of Mesoamerican studies
