MAIN IDEAS, page 6

Meaning of metaphor: brain = machine

Reason for eye surgeon example: to demonstrate brain plasticity—that the brain can grow and reorganize even after it has been affected by an injury such as a stroke.

Assumption behind Taub's therapy: people learn not to use the parts of the body that don't work. They stop using those parts and make up for it by using other parts.

Taub's reputation in scientific community: highly regarded; meticulous

Michael Merzenich's contribution to brain research: persuaded skeptics that the brain was plastic.

Details, page 6

Reasons the metaphor is wrong: the brain is not inanimate like a machine; it grows like plant; changes structure and function

Problem/treatment/reasons behind 1st

treatment choice: he didn't recover because the assumption was that brain cannot change. Thought that if part of body didn't work, it didn't work, and there was nothing to do about it.

How Taub's therapy works: put the good part of body, the limb, in a cast to train the injured part to work—not allow the affected limb NOT to work.

Evidence for Taub's reputation: studies exist to prove effectiveness and prove that other rehab methods are not effective

Examples of brain plasticity applications with children and adults: programs for children with learning disabilities, reading problems; For adults—reversed problems with memory, such as remembering names and faces, and driving.
