Phenomenology and Intercultural Understanding Kwok-Ying Lau, 2016-09-29 This book approaches the topic of intercultural understanding in philosophy from a phenomenological perspective It provides a bridge between Western and Eastern philosophy through in depth discussion of concepts and doctrines of phenomenology and ancient and contemporary Chinese philosophy Phenomenological readings of Daoist and Buddhist philosophies are provided the reader will find a study of theoretical and methodological issues and innovative readings of traditional Chinese and Indian philosophies from the phenomenological perspective The author uses a descriptive rigor to avoid cultural prejudices and provides a non Eurocentric conception and practice of philosophy Through

this East West comparative study a compelling criticism of a Eurocentric conception of philosophy emerges New concepts and methods in intercultural philosophy are proposed through these chapters Researchers teachers post graduates and students of philosophy will all find this work intriguing and those with an interest in non Western philosophy or phenomenology will find it particularly engaging *Deconstructing Digital Capitalism and the Smart Society* Mel van Elteren,2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future At the Center Casey Nelson Blake,Daniel H. Borus,Howard Brick,2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world awareness thinkers and artists sought to understand and secure principles that lay at the center of things From the onset of the Cold War in 1948 through 1963 they asked What defined the essential character of American culture Could permanent moral standards guide human conduct amid the flux and horrors of history In what ways did a stable self emerge through the life cycle Could scientific method rescue truth from error illusion and myth Are there key elements to democracy to the integrity of a society to order in the world Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale Yet other key figures rejected the search for a center asserting that freedom lay in the dispersion of cultural energies and the plurality of American experiences In probing the centering impulse of the era *At the Center* offers a unique perspective on the United States at the pinnacle of its power *Automation and Utopia* John Danaher,2019-09-24 Automating technologies threaten to usher in a workless future But this can be a good

thing if we play our cards right Human obsolescence is imminent The factories of the future will be dark staffed by armies of tireless robots The hospitals of the future will have fewer doctors depending instead on cloud based AI to diagnose patients and recommend treatments The homes of the future will anticipate our wants and needs and provide all the entertainment food and distraction we could ever desire To many this is a depressing prognosis an image of civilization replaced by its machines But what if an automated future is something to be welcomed rather than feared Work is a source of misery and oppression for most people so shouldn't we do what we can to hasten its demise Automation and Utopia makes the case for a world in which free from need or want we can spend our time inventing and playing games and exploring virtual realities that are more deeply engaging and absorbing than any we have experienced before allowing us to achieve idealized forms of human flourishing The idea that we should give up and retreat to the virtual may seem shocking even distasteful But John Danaher urges us to embrace the possibilities of this new existence The rise of automating technologies presents a utopian moment for humankind providing both the motive and the means to build a better future

Realities in Pedagogical and Phenomenological Contexts Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches

Unknowning and the Everyday Seema Golestaneh, 2022-12-26 In *Unknowning and the Everyday* Seema Golestaneh examines how Sufi mystical experience in Iran shapes contemporary life Central to this process is *ma rifat* or *unknowning* the idea that as it is ultimately impossible to fully understand the divine humanity must operate from an engaged awareness that it knows nothing Golestaneh shows that rather than considering *ma rifat* an obstacle to intellectual engagement Sufis embrace that there will always be that which they do not know From this position they affirm both the limits of human knowledge and the mysteries of the profane world Through ethnographic case studies Golestaneh traces the affective and sensory dimensions of *ma rifat* in contexts such as the creation of collective Sufi spaces the interpretation of Persian poetry formulations of selfhood and non selfhood and the navigation of the socio material realm By outlining the relationship between *ma rifat* and religious aesthetic and social life in Iran Golestaneh demonstrates that for

The Evolution of Human Wisdom Celia Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology [Passions of the Christ](#)

Reimagining Justice, Human Rights and Leadership in Africa Everisto Benyera, 2019-08-08 Failed attempts in Africa to develop democratised and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems

More Than a Feeling Adam J. Ramey,Jonathan D. Klingler,Gary E. Hollibaugh,2017-04-27 Whatever you think about the widening divide between Democrats and Republicans ideological differences do not explain why politicians from the same parties who share the same goals and policy preferences often argue fiercely about how best to attain them This perplexing misalignment suggests that we are missing an important piece of the puzzle Political scientists have increasingly drawn on the relationship between voters personalities and political orientation but there has been little empirically grounded research looking at how legislators personalities influence their performance on Capitol Hill With *More Than a Feeling* Adam J Ramey Jonathan D Klingler and Gary E Hollibaugh Jr have developed an innovative framework incorporating what are known as the Big Five dimensions of personality openness to experience conscientiousness extraversion agreeableness and neuroticism to improve our understanding of political behavior among members of Congress To determine how strongly individuals display these traits the authors identified correlates across a wealth of data including speeches campaign contributions and expenditures committee involvement willingness to filibuster and even Twitter feeds They then show how we might expect to see the influence of these traits across all aspects of Congress members political behavior from the type and quantity of legislation they sponsor and their style of communication to whether they decide to run again or seek a higher office They also argue convincingly that the types of personalities that have come to dominate Capitol Hill in recent years may be contributing to a lot of the gridlock and frustration plaguing the American political system
