*Sex and Race, Volume 3* J. A. Rogers, 2014-09-15 In the Sex and Race series first published in the 1940s historian Joel Augustus Rogers questioned the concept of race the origins of racial differentiation and the root of the color problem Rogers surmised that a large percentage of ethnic differences are the result of sociological factors and in these volumes he gathered what he called the bran of history the uncollected unexamined history of black people in the hope that these neglected parts of history would become part of the mainstream body of Western history Drawing on a vast amount of research Rogers was attempting to point out the absurdity of racial divisions Indeed his belief in one race humanity precluded the idea of several different ethnic races The series marshals the data he had collected as evidence to prove his underlying humanistic thesis that people were one large family without racial boundaries Self trained and self published Rogers and his work were immensely popular and influential during his day even cited by Malcolm X The books are presented here in their original editions

**Love and the Genders** Erik von Kuehnelt-Leddihn, 2019-12-13 Love and the Genders deals with the four forms of love Eros the love between the sexes the affections between family members friendship with the accent between the sexes and charity This scholarly book 60% elaborate footnotes is based on the author's German book Das Rätsel Liebe The Enigma of Love Vienna Herold 1975 All forms of love tend toward union The rapist does not love and masturbation needs no partner The book has profound cultural and even political implications What are the qualities and qualifications of the sexes their identities and specific roles Men are not superior to women and vice versa but they are radically different and the biological research in recent years has made a number of discoveries We only know since 1958 for certain that every cell in the male body carries an additional element the Y but brain research has proven that the sexual differences are not only hormonal known for a long time but are also in the brain Thus men and women are in no way interchangeable They are not made to compete Their differences are rather statistical than personal and there are situations in which they can or must substitute for each other Thus queens might have to rule and men might have occasionally to tend babies although they cannot nurse them A high culture is ordered such that the sexes genders might get their fulfillment and naturally they must feel affection for each other The point of view of this book is Christian which includes a Hebrew background It is not specifically Catholic and does not deal directly with sexual ethics Contraception is a sexual problem abortion is obviously plain murder Homosexuality is mentioned a bit more broadly Misandry and misogyny are referenced in the North American and European situation Friendship not sex or Eros is the most important element in marriage If one marries can the partner be a friend for a lifetime Fidelity belongs psychologically to friendship not to Eros or sex What about the political aspect of the love the interest the enthusiasm for otherness Leftists are identitarians This book with its scope and documentation is quite unique It deals basically with the crisis of our time and age

Cassio, Sara Kaczko, 2023-10-24 The studies presented in this volume deal with numerous and often undervalued aspects of multilingualism in Ancient Europe and the Mediterranean. Primarily but not exclusively they explore the impact of the great transnational languages Greek and Latin on numerous indigenous languages the latter mostly disappeared apart from a number of written texts often not well comprehensible but at the same time provided the dominant languages with loanwords some of them destined to enduring success. Moreover Greek and Latin were remarkably affected by their mutual contact with the complication that Greek was notoriously far from monolithic and in some areas its different dialects intermingled with each other and with the local languages. The case studies of this volume were conducted in the frame of a European HERA research on Multilingualism and Minority Languages in Ancient Europe which covered a number of very diverse areas with an emphasis on Sicily and Southern Italy, Illyria, Epirus, Macedonia, Thrace, Egypt and Asia Minor also in medieval and modern times. This book makes indispensable reading for anyone with an interest in multilingualism and language contact in Ancient Europe.
