Berry, Xavier Franch, 2011-03-18 This book constitutes the refereed proceedings of the 17th International Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2011 held in Essen Germany in March 2011 The 10 revised full papers and the 9 short papers presented were carefully reviewed and selected from 59 submissions The papers are organized in seven topical sections on security and sustainability process improvement and requirements in context elicitation models services embedded and real time systems and prioritization and traceability *Requirements Engineering: Foundation for Software Quality* Anne Hess, Angelo Susi, 2025-05-02 This book constitutes the refereed proceedings of the 31st International Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2025 held in Barcelona Spain during April 7 10 2025 The 21 full papers and 8 short papers included in this book were carefully reviewed and selected from 74 submissions They were organized in topical sections as follows Responsible RE Crowd and Large Scale RE Requirements Modeling Requirements Elicitation and Analysis Participatory RE RE for Safety critical and Autonomous Systems and Requirements Quality Assurance User-Centred Requirements Engineering Alistair Sutcliffe, 2012-12-06 If you have picked up this book and are browsing the Preface you may well be asking yourself What makes this book different from the large number I can find on amazon com Well the answer is a blend of the academic and the practical and views of the subject you won't get from anybody else how psychology and linguistics influence the field of requirements engineering RE The title might seem to be a bit of a conundrum after all surely requirements come from people so all requirements should be user centred Sadly that is not always so many system disasters have been caused simply because requirements engineering was not user centred or worse still was not practised at all So this book is about putting the people back into computing although not simply from the HCI human computer interaction sense instead the focus is on how to understand what people want and then build appropriate computer systems The Mollification Method and the Numerical Solution of Ill-Posed Problems Diego A. Murio, 1993-07-30 Over the past twenty years the subject of applied inverse theory ill posed problems has expanded from a collection of individual techniques to a rich highly developed branch of applied mathematics The Mollification Method and the Numerical Solution of Ill Posed Problems offers a self contained introduction to several of the most important practical computational methods that have been successfully applied to a wide

range of ill posed problems The book examines the mollification method and its multiple applications when used as a space marching method These computations are compared with various other methods used to arrive at the same numerical results Of special interest is a novel treatment of the two dimensional inverse heat conduction problem on a bounded domain There is a strong emphasis on computation supplemented by numerous exercises examples and illustrations Unlike most books on ill posed problems this volume contains all the motivations proofs algorithms and exercises necessary to fully understand the subject Materials are presented in clear simple language to make the subject accessible to readers with little or no background in ill posed problems For nonmathematicians an overview of essential mathematical tools is contained in an appendix References at the end of each chapter are supplemented with comments by the author and a second appendix offers up to date citations of literature on the inverse heat conduction problem to aid readers in further research An excellent text for upper level undergraduate or first year graduate courses on computational methods for inverse ill posed problems this book will also serve as a valuable reference work for professionals interested in modeling inverse phenomena

Fricker,Kurt Schneider,2015-03-13 This book constitutes the refereed proceedings of the 20th International Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2014 held in Essen Germany in April 2013 The 23 papers presented together with 1 keynote were carefully reviewed and selected from 62 submissions The REFSQ 15 conference is organized as a three day

symposium The REFSQ 15 has chosen a special conference theme I heard it first at RefsQ Two conference days were devoted to presentation and discussion of scientific papers The two days connect to the conference theme with a keynote an invited talk and poster presentations There were two parallel tracks on the third day the Industry Track and the new Research Methodology Track REFSQ 2015 seeks reports of novel ideas and techniques that enhance the quality of RE s products and processes as well as reflections on current research and industrial RE practices **Software Architecture** Henry Muccini,Paris Avgeriou,Barbora Buhnova,Javier Camara,Mauro Caporuscio,Mirco Franzago,Anne Koziolk,Patrizia Scandurra,Catia Trubiani,Danny Weyns,Uwe Zdun,2020-09-10 This book constitutes the refereed proceedings of the tracks and workshops which complemented the 14th European Conference on Software Architecture ECSA 2020 held in L Aquila Italy in September 2020 The 30 full papers and 9 short papers presented in this volume were carefully reviewed and selected from 72 submissions Papers presented were accepted into the following tracks and workshops ECSA 2020 Doctoral Symposium track ECSA 2020 Tool Demos track ECSA 2020 Gender Diversity in Software Architecture CASA 3rd International Workshop on Context aware Autonomous and Smart Architecture CSE QUDOS Joint Workshop on Continuous Software Engineering and Quality Aware DevOps DETECT 3rd International Workshop on Modeling Verification and Testing of Dependable Critical Systems FAACS MDE4SA Joint Workshop on Formal Approaches for Advanced Computing Systems and Model Driven Engineering for Software Architecture IoT ASAP 4th International Workshop on Engineering IoT Systems Architectures Services Applications and Platforms SASI4 2nd Workshop on Systems Architectures and Solutions for Industry 4 0 WASA 6th International Workshop on Automotive System Software Architecture The conference was held virtually due to the COVID 19 pandemic **Functional Thinking for Value Creation** Jürgen Hesselbach,Christoph Herrmann,2011-03-18 After the IPS2 conferences in Cranfield and Link ping in 2009 and 2010 the 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 takes place in Braunschweig Germany IPS2 itself is defined as an integrated industrial product and service offering that delivers value in use The customers expect comprehensive solutions which are adapted to their individual needs IPS2 offers the possibility to stand out from competition and for long term customer loyalty Particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines The 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas *Requirements Engineering: Foundation for Software Quality* Alessio Ferrari,Birgit Penzenstadler,2023-04-03 This book constitutes the refereed proceedings of the 29th International Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2023 which took place in Barcelona Spain during April 17 20 2023 The 12 full technical design and scientific evaluation papers 8 short research previews and vision papers and 5

experience reports presented in this volume were carefully reviewed and selected from 78 submissions They were organized in topical sections as follows Requirements communication and conceptualization NLP and machine learning for AI RE for artificial intelligence crowd RE and RE in practice *New methods to engineer and seamlessly reconfigure time triggered Ethernet based systems during runtime based on the PROFINET IRT example* Lukasz Wisniewski,2017-03-20 The objective of this dissertation is to design a concept that would allow to increase the flexibility of currently available Time Triggered Ethernet based TTEB systems however without affecting their performance and robustness The main challenges are related to scheduling of time triggered communication that may take significant amount of time and has to be performed on a powerful platform Additionally the reliability has to be considered and kept on the required high level Finally the reconfiguration has to be optimally done without affecting the currently running system *Software Applications: Concepts, Methodologies, Tools, and Applications* Tiako, Pierre F.,2009-03-31 Includes articles in topic areas such as autonomic computing operating system architectures and open source software technologies and applications **Software Engineering: Principles and Practices, 2nd Edition** Khurana Rohit,2010 This revised edition of Software Engineering Principles and Practices has become more comprehensive with the inclusion of several topics The book now offers a complete understanding of software engineering as an engineering discipline Like its previous edition it provides an in depth coverage of fundamental principles methods and applications of software engineering In addition it covers some advanced approaches including Computer aided Software Engineering CASE Component based Software Engineering CBSE Clean room Software Engineering CSE and formal methods Taking into account the needs of both students and practitioners the book presents a pragmatic picture of the software engineering methods and tools A thorough study of the software industry shows that there exists a substantial difference between classroom study and the practical industrial application Therefore earnest efforts have been made in this book to bridge the gap between theory and practical applications The subject matter is well supported by examples and case studies representing the situations that one actually faces during the software development process The book meets the requirements of students enrolled in various courses both at the undergraduate and postgraduate levels such as BCA BE BTech BIT BIS BSc PGDCA MCA MIT MIS MSc various DOEACC levels and so on It will also be suitable for those software engineers who abide by scientific principles and wish to expand their knowledge With the increasing demand of software the software engineering discipline has become important in education and industry This thoughtfully organized second edition of the book provides its readers a profound knowledge of software engineering concepts and principles in a simple interesting and illustrative manner *Cybersecurity Teaching in Higher Education* Leslie F. Sikos,Paul Haskell-Dowland,2023-05-15 This book collects state of the art curriculum development considerations training methods techniques and best practices as well as cybersecurity lab requirements and aspects to take into account when setting up new labs all based on hands on experience in teaching cybersecurity in higher education In parallel with the

increasing number and impact of cyberattacks there is a growing demand for cybersecurity courses in higher education More and more educational institutions offer cybersecurity courses which come with unique and constantly evolving challenges not known in other disciplines For example step by step guides may not work for some of the students if the configuration of a computing environment is not identical or similar enough to the one the workshop material is based on which can be a huge problem for blended and online delivery modes Using nested virtualization in a cloud infrastructure might not be authentic for all kinds of exercises because some of its characteristics can be vastly different from an enterprise network environment that would be the most important to demonstrate to students The availability of cybersecurity datasets for training and educational purposes can be limited and the publicly available datasets might not suit a large share of training materials because they are often excessively documented but not only by authoritative websites which render these inappropriate for assignments and can be misleading for online students following training workshops and looking for online resources about datasets such as the Boss of the SOC BOTS datasets The constant changes of Kali Linux make it necessary to regularly update training materials because commands might not run the same way they did a couple of months ago The many challenges of cybersecurity education are further complicated by the continuous evolution of networking and cloud computing hardware and software which shapes student expectations what is acceptable and respected today might be obsolete or even laughable tomorrow
