

Media Violence Effects on Children, Adolescents and Young Adults

By CRAIG A. ANDERSON, MA, PhD

I killed my first Klingon in 1979. It took place in the computer center at Stanford University, where I was playing a new video game based on the Star Trek television series. I was an "early adopter" of the new technology of video games, and continued to be so for many years, first as a fan of this entertainment medium, and later as a researcher interested in the question of what environmental factors influence aggressive and violent behavior.

Of course, like most young men and women of that era, I had grown up witnessing thousands of killings and other acts of aggression in a wide array of television shows and films. Today's youth are even more inundated with media violence than past generations, mostly from entertainment sources but also from news and educational media. And even though the public remains largely unaware of the conclusiveness of more than six decades of research on the effects of exposure to screen media violence, the scientists most directly involved in this research know quite a bit about these effects.

The briefest summary of hundreds of scientific studies can be boiled down to two main points. First, exposure to media violence is a causal risk factor for physical aggression, both immediately after the exposure and months, even years, later. Second, in the absence of other known risk factors for violence, high exposure to media violence will not turn a normal well-adjusted child or adolescent into a mass killer.

SOME DEFINITIONS

One reason for much of the confusion and debate among even highly educated citizens, health care professionals and even a few scientists is that when media violence researchers use certain terms and concepts, they have somewhat different meanings than when the general public uses the same words.

By "aggression," researchers mean "behavior that is intended to harm

another person who does not wish to be harmed." Thus, hitting, kicking, pinching, stabbing and shooting are types of physical aggression.

Playing soccer or basketball or even football with energy and confidence are not usually considered acts of aggression, even though that is what most coaches mean when they exhort their charges to "play aggressively." Somehow, the phrase "play assertively" doesn't have the same ring to it.

By "violent behavior," most modern aggression and violence scholars mean "aggressive behavior (as defined above) that has a reasonable chance of causing harm serious enough to require medical attention." Note that the behavior does not have to actually cause the harm to be classified as violent; shooting at a person but missing still qualifies as a violent behavior.

By "media violence" we mean scenes and story lines in which at least one character behaves aggressively towards at least one other character, using the above definition of "aggression," not the definition of "violence." Thus, television shows, movies, and video games in which characters fight (Power Rangers, for example), or say mean things about each other (often

Today's youth are even more inundated with media violence than past generations, mostly from entertainment sources but also from news and educational media.
