

Chapter 4**Population Biology, continued****Reinforcement and Study Guide****Section 4.2 Human Population Growth**

In your notebook, read about demographic trends.

Determine if the statement is true. If it is not, rewrite the italicized part to make it true.

1. Looking at past population trends is a good way to predict the future of human populations.

2. Demography is the study of population *health* characteristics.

3. Worldwide human populations have *decreased* exponentially over the past few centuries.

4. Humans are able to *decrease* environmental effects on the human population through controlling disease, eliminating competing organisms, and increasing food production.

5. To tell whether a population is growing, you must know the difference between the birthrate and the death rate.

6. The death rate is *decreasing* in the United States.

7. The birthrate is *increasing* in the United States.

8. *Survivor* is the number of offspring a female produces during her reproductive years.

9. In the United States, families are now *smaller* than in previous decades.

10. Birthrates and death rates of countries around the world are *basically* the same.

11. If a country has a high death rate, it may also have a high birthrate.

12. If a country has a low death rate and a high birthrate, it will grow slowly, if at all.
