Contemporary Task-Based Language Teaching in Asia

Michael Thomas,Hayo Reinders,2015-02-26 Over the last decade task based approaches to language learning and teaching TBLT have become a global focus of increased levels of research Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result This book focuses on Asia where this shift has been particularly in evidence TBLT has often been implemented in top down approaches to curriculum development which presents a huge range of challenges at the cultural as well as the pedagogic level Contemporary Task Based Language Teaching in Asia looks at the drivers stakeholders and obstacles across the region Some countries have adapted TBLT to deal with the local constraints others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts This collection is important to all involved in language development from curriculum reform to materials development It assists from programme evaluation to the setting of assessment standards The chapters cover all aspects of language education across Asia from primary to tertiary private and public education as well as innovations at local regional and national levels

Asia's Innovation Systems in Transition Jan Vang,2006-01-01 The success of Asian economies first Japan then Taiwan South Korea Singapore Hong Kong and more recently China and India has made it tempting to look for an Asian model of development However the strength of Asian development lies less in strategies that reproduce successful national systems of innovation and more in the capacity for institutional change to open up new development trajectories with greater emphasis on knowledge and learning The select group of contributors demonstrate that although there are important differences among Asian countries in terms of institutional set

South Asian Economic Development in the Era of Global

Turbulence Moazzem Hossain,Eliyathamby A. Selvanathan,Maneka Jaysinghe,Saroja Selvanathan,Rajat Kathuria,2025-03-28

South Asia's developing nations have been enjoying moderate to high growth over the past decade before the global pandemic of 2020 began. This new edition provides an up-to-date guide to the growing markets in South Asia in the post-COVID-19 period. It offers an analysis of the changes and consequences of high sustainable growth, investigating what has been achieved in the region over the last 2001-2023 from a macroeconomic viewpoint, identifying new challenges to 2030 and the end of the UNSDGs period. Part I of the textbook presents an analysis of how South Asia is rated against Southeast and East Asia in recent decades in economic and social terms. Part II focuses on South Asia's economic development over 2000 and the early 2020s. It demonstrates that globalization enhanced global trade and that trade further increased the region's prosperity up to 2020. Part III identifies major governance issues that were responsible for South Asia's social and economic underperformance due to the COVID-19 pandemic. This new edition includes a new chapter about AI and South Asia in the future. The textbook advocates for a shift in focus from policy reform per se to the more challenging task of implementing institutional reform that will invigorate the capability of the political leadership to bring about rapid sustained and poverty-reducing growth in South Asia in the post-Covid era. The book also considers climate change and the environment and it analyses the impact of these changes and developments on the economic health and social conditions in South Asia. The concluding chapter demonstrates current political unrest in three South Asian nations: Sri Lanka, Pakistan, and Bangladesh, termed the South Asian Spring. Offering an analysis of the changes and consequences of high sustainable growth in South Asia, this textbook will be useful for students and researchers in Development Economics, Business Economics, Development Studies, and Asian Studies.

Transformations in Higher Education Governance in Asia Darryl S. L. Jarvis, Ka Ho Mok, 2019-08-06

This book documents experimentation with various policy and governance approaches that produce structural differences in the composition and organisation of Asia's higher education systems. In view of the wide variation in the public and private provision of higher education, it showcases how issues of access, equity, and modes of participation are addressed, how institutional and programme quality are managed, and how academic labour is treated and developed. The book both maps these differences and analyses the country-level dynamics, policy approaches, and the problems faced by a variety of states in Asia in the race to develop competitive higher education systems. Focusing on the intersection of governance and higher education policy, it addresses the challenges facing higher education in Asia and the national responses of governments in terms of the organisation of the sector.
