Genetics and Evolution of Infectious Diseases Michel Tibayrenc, 2010-12-17 Genetics and Evolution of Infectious
Diseases is at the crossroads between two major scientific fields of the 21st century evolutionary biology and infectious
diseases The genomic revolution has upset modern biology and has revolutionized our approach to ancient disciplines such
as evolutionary studies In particular this revolution is profoundly changing our view on genetically driven human phenotypic
diversity and this is especially true in disease genetic susceptibility Infectious diseases are indisputably the major challenge
of medicine When looking globally they are the number one killer of humans and therefore the main selective pressure
exerted on our species Even in industrial countries infectious diseases are now far less under control than 20 years ago The
first part of this book covers the main features and applications of modern technologies in the study of infectious diseases
The second part provides detailed information on a number of the key infectious diseases such as malaria SARS avian flu HIV
tuberculosis nosocomial infections and a few other pathogens that will be taken as examples to illustrate the power of
modern technologies and the value of evolutionary approaches Takes an integrated approach to infectious diseases Includes
contributions from leading authorities Provides the latest developments in the field **The Structure and Dynamics of**

places and where they do occur they are usually quite rare Gaston discusses the structure of these distributions the structure
of the geographic ranges of species Gaston is particularly concerned with the factors that determine the limits to a species
geographic range how the sizes of those ranges vary and patterns in that variation Also considered are the distribution of
individuals amongst those sites where a species does occur and what determines that distribution and some of the practical
implications of all these Both in a pure and applied context ecologists need a broader perspective on their subject matter
