Teacher Distribution in Developing Countries Thomas F. Luschei, Amita Chudgar, 2016-11-08 This book draws on case studies from India Mexico and Tanzania to examine the complex processes that lead to the educational marginalization of children through differential access to teacher quality Growing evidence indicates that access to good teachers can boost the academic success of disadvantaged children and narrow achievement gaps between more and less privileged students Yet in many countries stronger teachers are concentrated in the classrooms of more advantaged children Using a teacher labor markets framework the authors explore the actions of those who employ teachers the demand side and teachers themselves the supply side Examining key junctures in the teacher career pipeline from recruitment and training to retention and transfer the authors find that the actions of the demand side often clash with teachers preferences to live and work in satisfactory environments or to be close to home and family Too often the misalignment of the demand and supply sides places marginalized children at a profound educational disadvantage

The Edtech Coaching Primer Ashley McBride, 2021 The role of the educational technology coach is not clearly understood by many of the individuals who are outside of the role This causes problems as funding is diverted which leads to these roles being cut or never created or the individuals who fill these roles are asked to perform tasks that pull them away from their most impactful work supporting teachers and helping improve teaching and learning This book proposes a framework that is flexible in its implementation but clear in defining the actionable steps that this role can take to have the greatest impact In short this book can be a catalyst for helping districts and schools develop a structure for educational technology coaching to promote growth in digital teaching and learning
