- Plate boundaries

Question: What happens when two continental plates?

- Collision:** Boundaries where two continental plates are moving towards each other. When the two continental plates meet, a mountain range is created. This is called a **collision zone**. One plate moves faster than the other so one plate moves.

How would you describe the motion of plates in a collision zone?

The plates are colliding together and creating the land to move up. One way is mountain range.

- Slip:** These are the edges of the plates. Boundaries where one plate moves faster than the other plate. One plate moves faster than the other plate.

Slip movement

Slip movement

- Spreading:** Two or three plates. When a plate is moving faster than the other plate. This is called a **spreading zone** or **divergent zone**.

North of North America, North of India, North of Asia.

What are the boundaries on the map below?
