Real Estate Guide Mortgages:

Nothing Down? Nothing Doing! Real Estate Guide for First-Time Buyers Alan Ray Hoxie, 2002-09 You've probably seen the infomercials on television offering books and tapes that show you how to buy and sell real estate with nothing down. But if making a fortune was as easy as the infomercials claim, why aren't the authors looking for the next big deal rather than peddling books and conducting seminars? This book shows you how to avoid the pitfalls that come from such get-rich-real-estate claims and reviews how you can really acquire property without a great deal of money. This book also discusses ways to buy and sell your first home. This will give you a head start when you enter the increasingly competitive real estate market. So forget the claims you see on television and read this book if you truly want to give real estate a try. **The Complete Guide to Passing Your Real Estate Sales License Exam on the First Attempt** Ken Lambert, 2008 Presents a clear and complete overview of all the main topics covered on the real estate salesperson examination. As many investors have learned the hard way, getting the wrong financing can wipe out their profits, hold them back from selling because of a lack of equity, or force them to try to sell for more than the market will bear. [The Real Estate Investor's Guide to Financing](#) is the one book that shows readers how to get the right financial package for the biggest return on their investment. As a respected author and mortgage banker, David Reed has spent more than 20 years helping investors finance their properties. Here he offers advice on such crucial topics as financing options for different property types, the financial implications of renting vs. flipping, setting rental rates, the challenges and benefits of being a landlord, including rent loss coverage, the pros and cons of having partners, tips on financing a second home, duplex, multi-family unit, or condo. Complete with essential advice on financing and a glossary of investment terms, this is the one guide that will help readers start making real money. **The Beginner's Guide to Real Estate Investing** Gary W. Ho, Sang-bin Yi, 2004 The essential premise of this book is that theory and practice are equally important in describing financial modeling In it the authors try to strike a balance in their discussions between theories that provide foundations for financial models and the institutional details that provide the context for applications of the models The book presents the financial models of stock and bond options exotic options investment grade and high yield bonds convertible bonds mortgage backed securities liabilities of financial institutions the business model and the corporate model It also describes the applications of the models to corporate finance Furthermore it relates the models to financial statements risk management for an enterprise and asset liability management with illiquid instruments The financial models are progressively presented from option pricing in the securities markets to firm valuation in corporate finance following a format to emphasize the three aspects of a model the set of assumptions the model specification and the model applications Generally financial modeling books segment the world of finance as investments financial institutions corporate finance and securities analysis and in so doing they rarely emphasize the relationships between the subjects This unique book successfully ties the thought processes and applications of the financial models together and describes them as one process that provides business solutions Created as a companion website to the book readers can visit www.thomasho.com to gain deeper understanding of the book's financial models Interested readers can build and test the models described in the book using Excel and they can submit their models to the site Readers can also use the site's forum to discuss the models and can browse server-based models to gain insights into the applications of the models For those using the book in meetings or class settings the site provides Power Point descriptions of the chapters Students can use available question banks on the chapters for studying
