Advanced Intelligent Computing Technology and Applications De-Shuang Huang, Yijie Pan, Wei Chen, Bo Li, 2025-07-21 This 20 volume set LNCS 15842 15861 constitutes in conjunction with the 4 volume set LNAI 15862 15865 and the 4 volume set LNBI 15866 15869 the refereed proceedings of the 21st International Conference on Intelligent Computing ICIC 2025 held in Ningbo China during July 26 29 2025 The total of 1206 regular papers were carefully reviewed and selected from 4032 submissions This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications Therefore the theme for this conference was Advanced Intelligent Computing Technology and Applications

Advanced Machine Learning Technologies and Applications Aboul-Ella Hassanien, Kuo-Chi Chang, Tang Mincong, 2021-03-04 This book presents the refereed proceedings of the 6th International Conference on Advanced Machine Learning Technologies and Applications AMLTA 2021 held in Cairo Egypt during March 22 24 2021 and organized by the Scientific Research Group of Egypt SRGE The papers cover current research Artificial Intelligence Against COVID 19 Internet of Things Healthcare Systems Deep Learning Technology Sentiment analysis Cyber Physical System Health Informatics Data Mining Power and Control Systems Business Intelligence Social media Control Design and Smart Systems

Typographical Journal , 1921 *The Systemic Image* Inge Hinterwaldner, 2023-10-31 A new conceptualization of the relationship between the systemic and the iconic in real time simulations that distinguishes among four levels of forming Computer simulations conceive objects and situations dynamically in their changes and progressions In *The Systemic Image* Inge Hinterwaldner considers not only the technical components of dynamic computer simulations but also the sensory aspects of the realization Examining the optic the acoustic the tactile and the sensorimotor impressions that interactive real time simulations provide she finds that iconicity plays a dominant yet unexpected role Based on this and close readings of a series of example works Hinterwaldner offers a new

conceptualization of the relationship between systemic configuration and the iconic aspects in these calculated complexes Hinterwaldner discusses specifications of sensorialization necessary to make the simulation dynamic perceivable Interweaving iconicity with simulation she explores the expressive possibilities that can be achieved under the condition of continuously calculated explicit changes She distinguishes among four levels of forming the systems perspective as a process and schema that establishes the most general framework of simulations the mathematical model which marks off the boundaries of the simulation s actualization the iconization and its orientation toward the user and interaction design necessary for the full unfolding of the simulation The user makes manifest what is initially latent Viewing the simulation as an interface Hinterwaldner argues that not only does the sensorially designed aspect of the simulation seduce the user but the user also makes an impact on the simulation on the dynamic and perhaps on the iconization although not on the perspectivation The influence is reciprocal

Distributed Multimedia Databases: Techniques and Applications Shih, Timothy K.,2001-07-01 In the last few years we have observed an explosive growth of multimedia computing communication and applications This revolution is transforming the way people live work and interact with each other and is impacting the way business government services education entertainment and healthcare are operating Yet several issues related to modeling specification analysis and design of distributed multimedia database systems and multimedia information retrieval are still challenging to both researchers and practitioners Distributed Multimedia Databases Techniques and Applications points out these challenges and provides valuable suggestions toward the necessary solutions by focusing on multimedia database techniques
