Building Automation and Digital Technologies Shahryar Habibi, 2022-03-17 Building automation systems and digital technologies are highly relevant for the environmental and energy performance of buildings However a clear gap remains between architectural engineering and the use of such technologies Building Automation and Digital Technologies shows how to assimilate automation and digital technologies into making buildings smarter and more environmentally sustainable This book shows why architects need smart and digital systems in building design and construction and promotes innovative technological tools for improving sustainability It focuses on the development of automated environmental conditions and how new technology informs architectural engineering The book also provides new evidence on the impact of building automation systems and digital technologies such as the Internet of Things artificial intelligence and information and communication technology for developing a performance based approach to the environmental sustainability of buildings and provides a key reference for architects on how digital technology can inform their practice Its four chapters cover developing strategies for improving sustainable and smart buildings architectural practice and construction technology creativity and innovation in building automation systems and the use phase of buildings Building Automation and Digital Technologies meets a critical need for a sustainable and smart built environment from an architectural perspective providing an important reference to architects and professionals in related fields by demonstrating the assimilation of the latest information and automation technologies Puts forward an architectural perspective on the design and construction of smart sustainable buildings Presents the use of digital technologies for design and construction Bridges the gap between architectural engineering and the use of automation and digital technology Considers the development of automated environmental conditions and new technology

Digitalisation of Local Energy Systems Weiqi Hua, Xiao-Ping Zhang, David C.H. Wallom, 2025-09-30 This book is a comprehensive guide to the digitalisation of local energy systems exploring the latest technologies and strategies for enhancing efficiency resilience and sustainability Written by leading experts in the field the book covers key topics such as smart grids IoT devices blockchain technology data analytics renewable energy integration demand side management electric vehicles energy storage virtual power plants policy and regulation and cybersecurity With real world case studies and examples of cutting edge research this book provides valuable insights for researchers practitioners and policymakers in the energy sector The book is particularly relevant for professionals working on the transition to net zero and the decarbonisation of local energy systems The book has the following unique features

- 1 Comprehensive coverage This book offers a comprehensive guide to the digitalisation of local

energy systems covering a range of topics from smart grids and renewable energy integration to demand side management and cybersecurity 2 Cutting edge research The book includes cutting edge research and real world case studies from leading experts in the field providing readers with valuable insights into the latest developments and trends 3 Interdisciplinary approach The book takes an interdisciplinary approach to the digitalisation of local energy systems drawing on expertise from engineering data science policy and regulation 4 Net zero focus The book is particularly relevant for professionals working on the transition to net zero and the decarbonisation of local energy systems providing practical strategies for enhancing efficiency resilience and sustainability 5 Global perspective The book features contributions from authors based in the UK USA China Ireland Sweden and Singapore providing a global perspective on the digitalisation of local energy systems and its implications for the energy sector worldwide

Mechanical Engineering And Control Systems - Proceedings Of 2015 International Conference (Mecs2015) Xiaolong Li,2016-01-15 This book consists of 113 selected papers presented at the 2015 International Conference on Mechanical Engineering and Control Systems MECS2015 which was held in Wuhan China during January 23 25 2015 All accepted papers have been subjected to strict peer review by two to four expert referees and selected based on originality ability to test ideas and contribution to knowledge MECS2015 focuses on eight main areas namely Mechanical Engineering Automation Computer Networks Signal Processing Pattern Recognition and Artificial Intelligence Electrical Engineering Material Engineering and System Design The conference provided an opportunity for researchers to exchange ideas and application experiences and to establish business or research relations finding global partners for future collaborations The conference program was extremely rich profound and featured high impact presentations of selected papers and additional late breaking contributions

Handbook of Generation IV Nuclear Reactors Igor Pioro,2016-06-09 Handbook of Generation IV Nuclear Reactors presents information on the current fleet of Nuclear Power Plants NPPs with water cooled reactors Generation III and III 96% of 430 power reactors in the world that have relatively low thermal efficiencies within the range of 32 36% compared to those of modern advanced thermal power plants combined cycle gas fired power plants up to 62% and supercritical pressure coal fired power plants up to 55% Moreover thermal efficiency of the current fleet of NPPs with water cooled reactors cannot be increased significantly without completely different innovative designs which are Generation IV reactors Nuclear power is vital for generating electrical energy without carbon emissions Complete with the latest research development and design and written by an international team of experts this handbook is completely dedicated to Generation IV reactors Presents the first comprehensive handbook dedicated entirely to generation IV nuclear reactors Reviews the latest trends and developments Complete with the latest research development and design information in generation IV nuclear reactors Written by an international team of experts in the field

Handbook of Web Based Energy Information and Control Systems Barney L. Capehart,Timothy Middelkoop,2020-12-22 This book promotes the benefits of the development and application of energy information and

control systems This wave of information technology IT and web based energy information and control systems web based EIS ECS continues to roll on with increasing speed and intensity This handbook presents recent technological advancements in the field as well as a compilation of the best information from three previous books in this area The combined thrust of this information is that the highest level functions of the building and facility automation system are delivered by a web based EIS ECS system that provides energy management facility management overall facility operational management and ties in with the enterprise resource management system for the entire facility or the group of facilities being managed

Computer Software Structures Integrating AI/KBS Systems in Process Control K.-E. Arzen, 2014-05-23 The past few years have seen rapid developments in computer technology giving rise to a range of system control options which can be applied in the process industries These include open systems expert systems neural networks fuzzy systems and object oriented systems all of which are covered in this key volume which provides an invaluable summary of the latest international research in this area

Electrical Theory and Application for HVACR Randy F Petit Sr., Turner L. Collins, Earl DeLatte, 2012-02-01 With the majority of HVACR service calls being electrical in nature it is important for technicians to have a solid understanding of electrical fundamentals allowing them to develop a systematic and methodical approach to troubleshooting Electrical Theory and Application for HVACR provides students and practicing technicians with the information and knowledge necessary to accurately and safely diagnose and solve electrical system faults Electrical Theory and Application for HVACR was written by HVACR instructors for HVACR instructors to simplify the instruction of electricity The manual is full of color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely diagnose and solve electrical system faults Main topics include safety and hazard awareness electrical fundamentals motors circuits and components wiring diagrams automated control systems and troubleshooting

Secure Fusion Estimation and Control for Cyber-Physical Systems Under Malicious Attacks Bo Chen, Tongxiang Li, Wen-An Zhang, Li Yu, 2025-01-03 The book focuses on the issues of secure fusion estimation and control in cyber physical systems under cyber attacks such as privacy protection under eavesdropping attacks security fusion estimation under DoS and FDI attacks and model based and model free security control under cyber attacks The comprehensive and systematic treatment of security protection in cyber physical systems is one of the main features of the book which is particularly suitable for readers interested in learning practical solutions for the security of cyber physical systems The book can benefit researchers engineers and graduate students in the fields of control science and engineering computer science communication engineering etc

Advanced Materials, Mechanical and Structural Engineering Seung Hong, Junwon Seo, Kihoon Moon, 2016-04-14 In the last decades advanced materials and mechanics has become a hot topic in engineering Recent trends show that the application of nanotechnology and environmental science together with advanced materials and mechanics are playing an increasingly important role in engineering applications For catching up with this current trend this

boo **Advances in Building Energy Research** Mat Santamouris,2010-09-23 Advances in Building Energy Research ABER offers state of the art information on the environmental science and performance of buildings linking new technologies and methodologies with the latest research on systems simulations and standards As stringently reviewed as a journal but with the breadth of a book this annual volume brings together invited contributions from the foremost international experts on energy efficiency and environmental quality of buildings Spanning a broad range of technical subjects this is a must have reference on global developments in the field suitable for architects and building engineers environmental engineers industry professionals students teachers and researchers in building science technical libraries and laboratories **Bridge Maintenance, Safety, Management, Resilience and Sustainability** Fabio Biondini,Dan M.
