The Degradation of Work? Stephen Wood, 2024-09-02 Originally published in 1982 and now reissued with a new Preface by Stephen Wood the contributors of this book discuss the issues surrounding the organization of labour They use insights from industrial sociology historical research and Marxist Feminist debates In particular they stress that work organization cannot be seen simply as a reflection of the strategy of an omniscient management any examination of it must involve product and labour markets technology trade unionism and above all the way in which production systems are jointly created out of the interrelationship between management and workforces The Degradation of Work asks if there has been a general de skilling and routinization of jobs and if skilled jobs are really any different from semi skilled or unskilled ones

Class Will Atkinson, 2023-11-28 Class is not only amongst the oldest and most controversial of all concepts in social science but also a topic which has fascinated amused incensed and galvanized the general public But what exactly is a class How do sociologists study and measure it and how does it correspond to everyday understandings of social difference in the twenty first century In a time when inequality has dramatically returned to the social scientific and political agenda this accessible and lively book explores these questions and more It takes readers through the key theoretical traditions in class research the major controversies that have shaken the field and the continuing effects of class difference class struggle and class inequality across a range of domains This new edition covers the latest research and scholarship and includes extended discussions of race the rise of national populism and the reconfigurations of class in a global age This book will appeal to students and scholars across the social sciences and anyone wanting to get a handle on this provocative concept

Workers' Participative Schemes Helen Tsiganou, 1991-05-30 Helen Tsiganou's study explores the enormous diversity of worker participation schemes across national contexts Using a historical comparative approach worker participation schemes are examined in two major settings the developed capitalist countries of the United States Japan Sweden Norway England Germany and France and the centrally planned less developed socialist countries of Yugoslavia Poland Hungary Czechoslovakia China and the Soviet Union Tsiganou addresses the conditions under which participation schemes emerge and the reasons for similarities or differences among these schemes She first studies the origins and history of schemes within a given national setting She then draws on specific national experiences and makes cross national comparisons This is not a systematic detailed country by country comparison but an explanation of the enormous diversity of worker participative schemes through comparative analysis Part I of this volume examines the motives and goals behind various participatory schemes and their development and outcomes in the two distinct settings The comparative logic and analytical framework of the book is laid out against a background of existing theoretical and analytical work Meanings and definitions attached to worker participation and their significance in denoting the dynamics of power within the workplace and society are also covered This section concludes with a discussion of the book's major assumptions Part II deals with the diversity of workers participation schemes in several developed countries countries with advanced industry and democratic pluralist political systems Part III discusses schemes in several centrally planned socialist societies and their efforts through reforms to correct their weaknesses The final section summarizes the findings of the study and explores issues that emerge as cross national and cross sectional comparisons are made

Lyon,2013-04-26 In this book David Lyon analyses the various contexts of surveillance activity and offers a balanced account of the influence electronic information systems have on the social order today **Ethnomethodology, Conversation**

Analysis and Constructive Analysis Graham Button,Michael Lynch,Wes Sharrock,2022-09-23 This book revisits the arguments by which Harvey Sacks and Harold Garfinkel opposed the widespread attempt in the social sciences to construct disciplinary theories and methods in place of common sense knowledge of human action and proposed instead an alternative that would investigate the organised methods of natural language use and common sense reasoning that constitute social orders arguments that led to the establishment and proliferation of ethnomethodology and conversation analysis As the very constructive analysis that they opposed has begun to be incorporated into influential lines of research in ethnomethodology and conversation analysis the authors return to the founding insights of the field and reiterate the importance of Garfinkel and Sacks original and controversial proposals for an alternate sociology of practical action and practical reasoning Showing how constructive analysis has become entrenched in ethnomethodology and conversation analysis and arguing for a need to re boot these approaches this volume constitutes a call for a renewal of the radical alternative proposed by Garfinkel and Sacks
