Crafting History Albena Yaneva, 2020-11-15 What constitutes an archive in

architecture What forms does it take What epistemology does it perform What kind of craft is archiving Crafting History provides answers and offers insights on the ontological granularity of the archive and its relationship with architecture as a complex enterprise that starts and ends much beyond the act of building or the life of a creator In this book we learn how objects are processed and catalogued how a classification scheme is produced how models and drawings are preserved and how born digital material battles time and technology obsolescence We follow the work of conservators librarians cataloguers digital archivists museum technicians curators and architects and we capture archiving in its mundane and practical course Based on ethnographic observation at the Canadian Centre for Architecture and interviews with a range of practitioners including Ivarø Siza and Peter Eisenman Albena Yaneva traces archiving through the daily work and care of all its participants scrutinizing their variable ontology scale and politics Yaneva addresses the strategies practicing architects employ to envisage an archive based future and tells a story about how architectural collections are crafted so as to form the epistemological basis of architectural history

Musical News, 1924 **Advanced Control and Supervision of Mineral Processing Plants** Daniel Sbárbaro, René Del Villar, 2010-08-20 Advanced Control and Supervision of Mineral Processing Plants describes the use of dynamic models of mineral processing equipment in the design of control data reconciliation and soft sensing schemes through examples it illustrates tools integrating simulation and control system design for comminuting circuits and flotation columns Coverage is given to the design of soft sensors based on either single point measurements or more complex measurements like images Issues concerning data reconciliation and its employment in the creation of instrument architecture and fault diagnosis are surveyed In consideration of the widespread use of distributed control and information management systems in mineral processing the book describes the platforms and toolkits available for implementing such systems Applications of the techniques described in real plants are used to highlight their benefits information for all of the examples together with supporting MATLAB code can be found at www.springer.com 978 1 84996 105 9
