

Should school uniform be compulsory?

3 pages | 509 words

School uniform is a standard set of clothes which is worn by a group of people. However, more and more people say that it may not be a must for students to wear a school uniform. People have debated this issue, many times. We should get to know both the advantages and disadvantages of wearing a school uniform. School uniform is an identification for students. It is a form of respect to the school.

There are some advantages of wearing a school uniform compulsorily. Firstly, wearing a school uniform can save the students' money and time on choosing what to wear to school because there is no need to purchase different clothing to wear. Also, they don't need to decide what to wear in the morning. It is a place for study, not a place for fashion. Secondly, wearing a school uniform can prevent mental comparisons between students. They will not be envious of other classmates clothing e.g expensive brand named or beautiful clothing because all the students must wear the same clothing, there are no comparisons. But we have collected opposite opinions on [argumentative essay samples](#).

Once you wear a school uniform and enter the school, all students will become equal. Thirdly, school uniform shows which school you belong to and it looks: neat, tidy and professional. It shows the tidiness and discipline of the school and decreases discrimination among peers. Therefore, wearing school uniform is good for students. On the contrary, there are voices from the students saying that they want more freedom, by wearing casual clothing. There are some disadvantages of wearing school uniform compulsorily.

Firstly, you wear comfortable and fashionable clothing that expresses your personality because school uniform is a uniform style. School uniform is rigid, and all the people look the same and cannot express their personality. It would inhibit the students feelings of self-expression. Secondly, if you don't wear school uniform, you will spend too much money buying different clothes to wear to school every day. Casual clothing is our necessities in our life, we have to buy them. Therefore, we should be able to wear it at school. Therefore, they don't need to spend extra money to buy a school uniform, to wear.

Thirdly, students can wear any style and colour that they prefer. They can make themselves look beautiful and fashionable. It is good for students to show their individuality and it makes students feel more self-confident. It also fills the whole school, with colour, instead of wearing a school uniform that seems very rigid, and boring.

As a conclusion, coins have two different sides, similar to the opposing opinions about having a compulsory school uniform. There are some advantages and disadvantages about wearing school uniform. Although, wearing a school uniform is a better choice for students, a uniform can represent the identification of students, the respect to the school and also the respect of being a student. A school is a place for students to learn, to study. Students should concentrate on their studies, not what they are...

Education and Democracy William Reid, Jane Filby, 2018-10-03 Developments in educational systems are inextricably linked with the social and political evolution of nations Nowhere is this more clearly to be seen than in the history of the English sixth form Originally published in 1982 this book whose authors had been associated with a number of research projects into 16 19 education traces the tradition of the sixth form from its origins in the public schools of the nineteenth century through to controversies at the time over sixth form and tertiary colleges and the extension of 16 19 education to embrace youth opportunities programmes and other semi vocational courses It shows that the sixth has not only been a significant element in its own right in the adjustment of English society to the challenge of democratic ideals but has also played a key role in the evolution of secondary education from the endowed school of the nineteenth century through the municipal grammar schools set up after the 1902 Education Act to the comprehensive secondary schools of today In fact the fate and future of comprehensive schooling becomes fully understandable only through a study of the sixth form tradition which has shaped the activities of educationists and policy makers over the last hundred years The authors conclude that educational policy making is both facilitated and constrained by the existence of enduring traditions stemming from the past in fact the work of policy making lies precisely in the constructive reinterpretation of that inheritance This book describes and clarifies the nature of the tradition of sixth form education which has been handed down to us and its relation to democratic values and institutions

The Nature of Order, Book Four: The Luminous Ground Christopher Alexander, 2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities The foundations of modern scientific thought are firmly rooted in a conception that the universe is a machinelike entity a play of baubles machines trinkets To this day our real daily experience of ourselves has no clear place in science It is little wonder that a machine like worldview has supported the deadly architecture of the last century This mechanistic thinking and the consequent investment oriented tracts of houses condominiums and offices have dehumanized our cities and our lives How are spirit soul emotion feeling to be introduced into a building or a street or a development project in modern times The Luminous Ground the fourth book of The Nature of Order contains what is perhaps the deepest revelation in the four volume work Here is a geometrical view of space and matter seamlessly connected to our own private personal experience as sentient and knowing creatures This is not merely an emotional appendix to the scientific theory of the other books It is at the core of the entire work and is rooted in the fact that our two sides our analytical thinking selves and our vulnerable emotional personalities as human beings are coterminous They must be harnessed at one and the same time if we are ever to really make sense of what is around us and be able to create a living world Alexander breaks away completely from the one sided mechanical model of buildings or neighbourhoods as mere assemblages of technically generated interchangeable parts He shows us conclusively that a spiritual emotional and personal basis must underlie every act of building His buildings and works of art demonstrate in detail what he means And then in the middle of the book comes the linchpin of the work a one hundred page chapter on colour which lavishly illustrates and dramatically conveys the way that consciousness and spirit can make their appearance in the world Altogether present throughout this fourth and final book is a new cosmology uniting matter and consciousness consciousness inextricably joined to the substrate of matter present in all matter and providing all wholeness with its material cognitive and spiritual underpinnings This view though

radical conforms to our most ordinary daily intuitions It may provide a path for those contemporary scientists who are beginning to see consciousness as the underpinning of all matter and thus as a proper object of scientific study Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture
