Science and Societies in Frankfurt am Main Ayako Sakurai,2015-10-06 Sakurai presents a study of how scientific societies affected the social and political life of a city As it did not have a university or a centralized government Frankfurt am Main is an ideal case study of how scientific associations funded by private patronage for the good of the local populace became an important centre for natural history Science and Societies in Frankfurt am Main Ayako Sakurai,2016-09-12 The nineteenth century saw science move from being the preserve of a small learned elite to a dominant force which influenced society as a whole Sakurai presents a study of how scientific societies affected the social and political life of a city As it did not have a university or a centralized government Frankfurt am Main is an ideal case study of how scientific associations funded by private patronage for the good of the local populace became an important centre for natural history

Adolphe Quetelet, Social Physics and the Average Men of Science, 1796-1874 Kevin Padraic Donnelly,2015-06-15 Adolphe Quetelet was an influential astronomer and statistician whose controversial work inspired heated debate in European and American intellectual circles In creating a science designed to explain the average man he helped contribute to the idea of normal most enduringly in his creation of the Quetelet Index which came to be known as the Body Mass Index Kevin Donnelly presents the first scholarly biography of Quetelet exploring his contribution to quantitative reasoning his place in nineteenth century intellectual history and his profound influence on the modern idea of average *Brewing Science, Technology and Print, 1700-1880* James Sumner,2015-10-06 How did the brewing of beer become a scientific process Sumner explores this question by charting the theory and practice of the trade in Britain and Ireland during the eighteenth and nineteenth centuries **The Cambridge History of Science: Volume 8, Modern Science in National,**

Transnational, and Global Context Hugh Richard Slotten,Ronald L. Numbers,David N. Livingstone,2020-04-09 This volume in the highly respected Cambridge History of Science series is devoted to exploring the history of modern science using national transnational and global frames of reference Organized by topic and culture its essays by distinguished scholars offer the most comprehensive and up to date nondisciplinary history of modern science currently available Essays are grouped together in separate sections that represent larger regions Europe Africa the Middle East South Asia East and Southeast Asia the United States Canada Australia New Zealand Oceania and Latin America Each of these regional groupings ends with a separate essay reflecting on the analysis in the preceding chapters Intended to provide a balanced and inclusive treatment of the modern world contributors analyze the history of science not only in local national and regional contexts but also with respect to the circulation of knowledge tools methods people and artifacts across national borders *Uncommon Contexts: Encounters between Science and Literature, 1800-1914* Ben Marsden,Hazel Hutchinson,Ralph O'Connor,2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines

relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely

Urban Histories of Science Oliver Hochadel, Agustí Nieto-Galan, 2018-09-20 This book tells ten urban histories of science from nine cities Athens Barcelona Budapest Buenos Aires Dublin 2 articles Glasgow Helsinki Lisbon and Naples situated on the geographical margins of Europe and beyond Ranging from the mid nineteenth to the early twentieth centuries the contents of this volume debate why and how we should study the scientific culture of cities often considered peripheral in terms of their production of knowledge How were scientific practices debates and innovations intertwined with the highly dynamic urban space around 1900 The authors analyze zoological gardens research stations observatories and international exhibitions along with hospitals newspapers backstreets and private homes while also stressing the importance of concrete urban spaces for the production and appropriation of knowledge They uncover the diversity of actors and urban publics ranging from engineers scientists architects and physicians to journalists tuberculosis patients and fishermen Looking at these nine cities around 1900 is like glancing at a prism that produces different and even conflicting notions of modernity In their totality the ten case studies help to overcome an outdated centre periphery model This volume is thus able to address far more intriguing historiographical questions How do science technology and medicine shape the debates about modernity and national identity in the urban space To what degree do cities and the heterogeneous elements they contain have agency These urban histories show that science and the city are consistently and continuously co constructing each other

Free Will and the Human Sciences in Britain, 1870-1910 Roger Smith, 2015-10-06 Smith takes an in depth look at the question of free will through the prism of different disciplines in the late nineteenth and early twentieth centuries

The Making of British Anthropology, 1813-1871 Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century But the observational practices that characterized the study of human diversity developed from the established sciences of natural history geography and medicine Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study Far from being an evolutionary dead end nineteenth century anthropology laid the foundations for the field based science of anthropology today

Victorian Literature and the Physics of the Imponderable Sarah C Alexander, 2015-10-06 The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or imponderable

Victorian Medicine and Popular Culture Louise Penner, Tabitha Sparks, 2016-09-12 This collection of essays explores the rise of scientific medicine and its impact on

Victorian popular culture Chapters include an examination of Charles Dickens's involvement with hospital funding concerns over milk purity and the theatrical portrayal of drug addiction plus a whole section devoted to the representation of medicine in crime fiction This is an interdisciplinary study involving public health cultural studies the history of medicine literature and the theatre providing new insights into Victorian culture and society **Astronomy in India, 1784-1876** Joydeep

Sen,2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy

The Making of Modern Anthrax, 1875-1920 James F. Stark,2016-08-05 From the mid nineteenth century onwards a number of previously unknown conditions were recorded in both animals and humans Known by a variety of names and found in diverse locations by the end of the century these diseases were united under the banner of anthrax Stark offers a fresh perspective on the history of infectious disease He examines anthrax in terms of local national and global significance and constructs a narrative that spans public professional and geographic domains *The Age of Scientific Naturalism* Bernard

Lightman,Michael S. Reidy,2016-02-19 Physicist John Tyndall and his contemporaries were at the forefront of developing the cosmology of scientific naturalism during the Victorian period They rejected all but physical laws as having any impact on the operations of human life and the universe Contributors focus on the way Tyndall and his correspondents developed their ideas through letters periodicals and scientific journals and challenge previously held assumptions about who gained authority and how they attained and defended their position within the scientific community **The Medical Trade**

Catalogue in Britain, 1870-1914 Claire L. Jones,2016-08-05 By the late nineteenth century advances in medical knowledge technology and pharmaceuticals led to the development of a thriving commercial industry The medical trade catalogue became one of the most important means of promoting the latest tools and techniques to practitioners Drawing on over 400 catalogues produced between 1870 and 1914 Jones presents a study of the changing nature of medical professionalism She examines the use of the catalogue in connecting the previously separate worlds of medicine and commerce and discusses its importance to the study of print history more widely **Nineteenth-Century Germany** John Breuilly,2019-10-31 John

Breuilly brings together a distinguished group of international scholars to examine Germany's history from 1780 to 1918 featuring chapters on economic demographic and social as well as cultural and intellectual history There are also chapters on political and military history covering the revolutionary and Napoleonic wars the post Napoleonic period the revolutions of 1848 1849 the unification of Germany Bismarckian Germany and Wilhelmine Germany and Germany during the First World War This new edition which retains the helpful further reading suggestions for each chapter and a chronology has been

completely updated to take account of recent historiography The statistical data has been expanded more maps and images have been introduced and there are two new chapters on transnational approaches and gender history Finally the editor has added a conclusion which reflects on the key developments in the history of Germany over the long nineteenth century Providing clear surveys of the central events and developments and addressing major debates amongst historians Nineteenth Century Germany is vital reading for all those wishing to understand this crucial period in modern German history

Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950 Eszter Gantner, Heidi

Hein-Kircher, Oliver Hochadel, 2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative This applied urban knowledge was generated through interurban networks and multi directional exchanges Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery This volume will appeal to scholars from a large number of disciplines including urban historians historians of Eastern and Southern Europe historians of science and medicine and scholars interested in transnational connections Animal History in the Modern City Clemens Wischermann, Aline

Steinbrecher, Philip Howell, 2018-09-06 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Animals are increasingly recognized as fit and proper subjects for historians yet their place in conventional historical narratives remains contested This volume argues for a history of animals based on the centrality of liminality the state of being on the threshold not quite one thing yet not quite another Since animals stand between nature and culture wildness and domestication the countryside and the city and tradition and modernity the concept of liminality has a special resonance for historical animal studies Assembling an impressive cast of contributors this volume employs liminality as a lens through which to study the social and cultural history of animals in the modern city It includes a variety of case studies such as the horse human relationship in the towns of New Spain hunting practices in 17th century France the birth of the zoo in Germany and the role of the stray dog in the Victorian city demonstrating the interrelated nature of animal and human histories Animal History in the Modern City is a vital resource for scholars and students interested in animal studies urban history and historical geography Haeckel's Embryos Nick Hopwood, 2015-05-11 Pictures from the past powerfully shape current views of the world In books television programs and websites new images appear alongside others that have

survived from decades ago Among the most famous are drawings of embryos by the Darwinist Ernst Haeckel in which humans and other vertebrates begin identical then diverge toward their adult forms But these icons of evolution are notorious too soon after their publication in 1868 a colleague alleged fraud and Haeckel s many enemies have repeated the charge ever since His embryos nevertheless became a textbook staple until in 1997 a biologist accused him again and creationist advocates of intelligent design forced his figures out How could the most controversial pictures in the history of science have become some of the most widely seen In Haeckel s Embryos Nick Hopwood tells this extraordinary story in full for the first time He tracks the drawings and the charges against them from their genesis in the nineteenth century to their continuing involvement in innovation in the present day and from Germany to Britain and the United States Emphasizing the changes worked by circulation and copying interpretation and debate Hopwood uses the case to explore how pictures succeed and fail gain acceptance and spark controversy Along the way he reveals how embryonic development was made a process that we can see compare and discuss and how copying usually dismissed as unoriginal can be creative contested and consequential With a wealth of expertly contextualized illustrations Haeckel s Embryos recaptures the shocking novelty of pictures that enthralled schoolchildren and outraged priests and highlights the remarkable ways these images kept on shaping knowledge as they aged

Spatializing the History of Ecology Raf de Bont,Jens Lachmund,2017-06-26 This book advances a spatial perspective on the history of ecology Intrigued by broader debates in the humanities on the spatial turn the authors contribute to a more explicit and systematic development of spatial thinking in the history of ecology exploring to which extent a spatial perspective can shed new light on the history of ecological science and using ecology as a critical site to gain broader insights into the history of the environment in the nineteenth and twentieth centuries
