

SCIENCE & TECHNOLOGY: READING COMPREHENSION

Read the text below and answer the questions that follow.

TECHNOLOGICAL WONDERS

For decades, hot-air balloons, aeroplanes and helicopters have been a familiar sight in our skies. Now, a new flying gadget is invading our airspace. Drones are buzzing around performing various tasks.

Drones are aircrafts that do not have a human pilot on board. They were first used by the military. The technology was developed so that dangerous reconnaissance flights could be carried out over enemy territory without putting pilots in danger.

However, drones are used for many other purposes nowadays. They have become useful tool for search and rescue teams. Drones are capable of searching large areas to locate missing people. Travelling at speeds of 80km/h, they can reach lost people much faster than rescue personnel searching on foot.

Drones are also used in photography and cinematography. This technology allows photographers to take amazing aerial shots without having to hang precariously from tall structures.

1. Why did the military develop drone technology?

- A. To deliver supplies.
- B. To spy on the enemy.
- C. To shoot down enemy planes.
