Africa in Contemporary Perspective Manuh, Takyiwaa, Sutherland-Addy, Esi, 2014-05-08 An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s Unfortunately hardly any readers exist which bring together a body of knowledge on the themes issues and debates which inform and animate research and teaching in African Studies particularly on the African continent This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised but driven from internal understandings of life and prospects in Africa Dominant representations and perceptions of Africa usually depict a continent in crisis Rather than buying into external representations of Africa with its lacks and aspirations for Western modernities we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri lingual overlapping and dense reality of life and developments on the continent to produce relevant and usable knowledge Continuing and renewed interest in Africa s resources including the land mass economy minerals visual arts and performance cultures as well as bio medical knowledge and products by old and new geopolitical players obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa s people

World Scientific Handbook Of Transboundary Water Management: Science, Economics, Policy And Politics (In 4 Volumes), 2025-01-10 The impacts of population growth climate change and water scarcity and variability on a country's economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import Over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater's strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers This multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management In particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs Each edited volume in the set aims to build on extant research while also fostering new paths of inquiry Overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious natural resource from socio political legal economic and

technological perspectives Volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective It explains the role of international water law IWL and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives Volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater It presents case studies and legal and political analyses that focus on the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves Volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes The volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict Volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions

Global Challenges in Maritime Security Lisa Otto, Anja Menzel, 2024-10-22

Achieving sustainability is perhaps the single most important task for our generation In the face of a looming climate disaster calls for the sustainable use of the world's resources are getting louder As the sea covers more than 70 per cent of the earth's surface this holds even more true for the use of ocean resources Despite its vastness the sea has often been a securitised and politicised space where the concepts of sustainability and security meet at sea in the form of a myriad of important contemporary issues In this volume we set out the intersection between sustainability and security alongside the security development nexus and examine these issues under four dimensions of security economic security ecological security human security and traditional security Within sections dedicated to each of these we explore both theory and practice by offering cases alongside a conceptual discussion and in so doing cover topics ranging from the Blue Economy and the net zero agenda to natural disasters and climate change from food security and the future of Small Island Developing States to the geopolitics of the Arctic This book takes a bird's eye view connecting the dots between these issues of security and sustainability and ending with scenarios for the future with policy making in mind This volume presents a timely and compelling argument that policymakers and scholars need to come to terms with the intersection of sustainability and security at sea The editors detail a clear and insightful conceptual approach for grasping the simultaneity and interplay of security and sustainability concerns that will give inspiration to further research in the field Chapter contributors convincingly illustrate aspects of this approach across regions scales and sites of political engagement from port cities to the UN A must read for students researchers and practitioners of ocean politics Elana Wilson Rowe Research Professor at the Norwegian Institute of International Affairs NUPI Too often issues of security and sustainability at sea have been studied in narrow terms This volume makes a critical

contribution the literature by unpacking the interconnections and interdependence between these two vitally important issues Robert McCabe Assistant Professor and Director of the MA Maritime Security Programme at Coventry University In this timely publication an international set of contributors portray a rich array of views on the oceans security and sustainability for the reader Of particular value is how the security sustainability nexus runs through the chapters to emphasise the ever growing importance and relevance of this interplay Francois Vre Professor Emeritus of Military Science and Research Coordinator at the Security Institute for Governance and Leadership in Africa SIGLA Stellenbosch University
