 another s body Drawing on Roman and Greek works of science medicine gynecology and law and on Christian and pagan
 religious texts Aline Rouselle discovers the intimate fears passions superstitions and ambitions of the people of the
 Mediterranean world during the first four centuries AD The first part of the book describes Roman notions of male and
 female sexuality attitudes to fertility inheritance child care and training legal restraints on sexual behavior concubinage and
 divorce and the extraordinary rituals of orgy castration and sacrifice associated with ancient rites of fertility and spirituality
 Yet the sexual problems of antiquity will be seen in many respects to be almost exactly those of the contemporary West from
 fear of impotence to the concern of parents about teenage misbehavior The second part of the work is concerned with the
 impact of Christian ideas upon a settled pagan tradition Abstinence once associated with the enhancement of fertility
 becomes the key to salvation The first monastic regimes and the means by which men and women curtailed and overcame
 their desire for one another are described in detail Centuries of concern with fertility became in this revolutionary period an
 obsession with chastity in this world and a secure place in the next This is a tour de force of scholarship and historical
 anthropology The author s argument may be controversial but few can fail to be fascinated by the evidence she marshals to
 support it **Cosmos** Louis Bouyer,1988 Louis Bouyer one of the 20th century giants of Catholic theology here addresses a

Love and Justice as Competences Luc Boltanski,2012-07-16 People care a great deal about justice They protest and engage in confrontations with others when their sense of justice is affronted or disturbed When they do this they don t generally act in a strategic or calculating way but use arguments that claim a general validity Disputes are commonly regulated by these regimes of justice implicit in everyday social life But justice is not the only regime that governs action There are some actions that are selfless and gratuitous and that belong to what might be called a regime of peace or love In the course of their everyday lives people constantly move back and forth between these two regimes that of justice and that of love And

everyone also has the capacity for violence which arises when the regulation of action within either of these regimes breaks down In Love and Justice as Competences Boltanski lays out this highly original framework for analysing the action of individuals as they pursue their day to day lives The framework outlined in this important book is the basis for the path breaking work that he has developed over the last twenty years work that has examined the moral foundations of society in and through the forms of everyday conflict For anyone who wants to understand what a critical sociology might mean today this book is an essential text *Les infiltrations maçonniques dans l'Eglise* Emmanuel Barbier,1910 **Eranos Jahrbuch, 1970** Portmann,Ritsema,2023-09-20 Saints hommes de Chiraz et du Fârs Denise Aigle,2023-09-20 In Saints hommes de Chiraz et du Fârs Pouvoir sociétal et lieux de sacralité Xe-XVe s Denise Aigle studies the spiritual role but also the political one played by the Sufi shaykhs From the tenth century Fârs was a land of holiness with Shaykh Kabir in Shiraz and Murshid al-Din Ab Isq in Kharân This research is based on hagiographic sources historical chronicles literary sources and archival documents The author shows how the pre Islamic history of Fârs was integrated into spiritual Islam thanks to the mystical speculations of the Sufi shaykhs The particular interest of this research is its contribution to the history of Luristan a region that has long remained terra incognita Thanks to handwritten hagiographic documents preserved in several private libraries we discover the existence and the role of spiritual masters until now totally unknown *A Natural History of Time* Pascal Richet,2009-10-15 The quest to pinpoint the age of the Earth is nearly as old as humanity itself For most of history people trusted mythology or religion to provide the answer even though nature abounds with clues to the past of the Earth and the stars In *A Natural History of Time* geophysicist Pascal Richet tells the fascinating story of how scientists and philosophers examined those clues and from them built a chronological scale that has made it possible to reconstruct the history of nature itself Richet begins his story with mythological traditions which were heavily influenced by the seasons and almost uniformly viewed time cyclically The linear history promulgated by Judaism with its story of creation was an exception and it was that tradition that drove early Christian attempts to date the Earth For instance in 169 CE the bishop of Antioch for instance declared that the world had been in existence for 5 698 years and the odd months and days Until the mid eighteenth century such natural timescales derived from biblical chronologies prevailed but Richet demonstrates with the Scientific Revolution geological and astronomical evidence for much longer timescales began to accumulate Fossils and the developing science of geology provided compelling evidence for periods of millions and millions of years a scale that even scientists had difficulty grasping By the end of the twentieth century new tools such as radiometric dating had demonstrated that the solar system is four and a half billion years old and the universe itself about twice that though controversial questions remain The quest for time is a story of ingenuity and determination and like a geologist Pascal Richet carefully peels back the strata of that history giving us a chance to marvel at each layer and truly appreciate how far our knowledge and our planet have come
