Science And Creation From Eternal Cycles To An Oscillating Universe:

Science and Creation: from Eternal Cycles to an Oscillating Universe Stanley L. Jaki, 1974 This is the first systematic probing into perhaps the most puzzling but least discussed fact of cultural history the birth of science Cultural history abounds in parallel achievements but it happened only once between 1250 and 1650 that rudimentary science turned into a self sustaining enterprise Such a singular process can hardly be without a lesson the grasp of which might be of crucial importance for the future of mankind To unfold this lesson the author Stanley L Jaki Distinguished University Professor at Seton Hall University New Jersey and an internationally renowned historian and philosopher of science first gives a detailed analysis of ancient Hindu Chinese Maya Egyptian Babylonian and Greek cultures all of which especially the Greek could boast a valuable start in science Yet in all of them science suffered a stillbirth They all failed to muster up a sufficient measure faith in progress confidence in the rationality of the universe appreciation of the quantitative method and a depersonalized view of the process of motion all qualities which are the main features of the scientific quest Because the Koran overemphasized the will of the Creator Muslim scholars fell prey to a mistrust in the validity of rational laws and as a result science came to a standstill among the Arabs as well Quite different was the case in the Christian medieval West where the biblical faith in the Creator permeated for the first time a whole culture and effectively produced the qualities described above The ultimate result was the rise of classical physics Such is the main theme of a highly original book in which an astonishing wealth of information is marshalled to unfold as the author states the ultimate consequences of some basic presuppositions The work is a classic effort of synthesis full of drama that vibrates through the long history of science publisher description

Science and Creation; From Eternal Cycles to an Oscillating Universe, by Stanley L. Jaki Stanley L. Jaki, 1974

God Who Stands and Stays Carl F. H. Henry, 1999-01-01 Part 6 in a monumental six volume set that presents an undeniable case for the revealed authority of God to a generation that has forgotten who he is and what he has done

The Mystery of Reason Paul Haffner, 2001 The Mystery of Reason investigates the enterprise of human thought searching for God People have always found stepping stones to God's existence carved in the world and in the human condition This book examines the classical proofs of God's existence and affirms their continued validity It shows that human thought can connect with God and with other aspects of religious experience Moreover it depicts how Christian faith is reasonable and is neither blind nor naked Without reason belief would degenerate into fundamentalism but without faith human thought can remain stranded on the reef of its own self sufficiency This book proposes that the human mind must be in partnership with the human heart in any quest for God Paul Haffner is lecturer in systematic and dogmatic theology in Rome at the Pontifical Gregorian University the Pontifical Lateran University and the Pontifical Athenaeum Regina Apostolorum In this series he has published The Mystery of Creation The Mystery of Mary and The Sacramental Mystery

The Intelligible Universe Julio Antonio Gonzalo, 2008 This interesting book reviews WMAP's main results 2003 and discusses in detail how the accurate

qualitative results for the age of the universe and the Hubble constant were anticipated in an article published five years before in *Acta Cosmologica Krakow*. In the final chapter on Cosmic Numbers it is shown that as a result of the coincidence at decoupling time between atom formation and matter radiation equality a reasonable cosmic justification for the mass ratio of protons and electrons is obtained.

Cosmic Paradoxes (Third Edition) Julio A Gonzalo, 2022-08-18

Cosmic Paradoxes was an outcome of a Conference Summer Course on Astrophysical Cosmology Frontier Questions held at El Escorial Madrid on August 16-19 1993. The Scientific Directors were John C Mather Director of NASA's COBE Cosmic Background Radiation Explorer and Jose M Torroja Secretary of the Spanish Academy of Sciences. Julio A Gonzalo UAM was in charge of coordinating the event. The first speaker was Ralph A Alpher one of the pioneers who predicted very early the CBR Cosmic Background Radiation. The CBR was observed by A Penzias and R Wilson Bell Telephone Labs in 1965. Thereafter it was measured with unprecedented precision by the COBE in 1989 characterizing the Planck spectral distribution of the CBR. J C Mather and detecting its minute anisotropies G Smoot. In 2003 the WMAP NASA's satellite successor of the COBE confirmed COBE's results and gave an excellent quantitative estimate of the age of the universe as 13.7 ± 0.2 Gyrs in support of the Big Bang theory of cosmic origins.

In the Third Edition of this book almost coincident with the launch reports of NASA's James Webb Space Telescope JWST includes recent work discussing evidence in favor of an open finite universe. A further discussion of the Heisenberg-Lemaître time Appendix D takes into consideration that the cosmic expansion velocity at very early times is yH/c and reviews in more detail the thermal history of the universe.

[Science and Christianity](#) J. B. Stump, 2016-09-08

Science and Christianity is an accessible engaging introduction to topics at the intersection of science and Christian theology. A philosophically orientated treatment that introduces the relationship of science to Christianity and explores to what extent the findings of science affect traditional Christian theology. Addresses important theological topics in light of contemporary science including divine action, the problem of natural evil and eschatology. Historically oriented chapters and chapters covering methodological principles for both science and theology provide the reader with a strong foundational understanding of the issues. Includes feature boxes highlighting quotations, biographies of major scientists and theologians, key terms and other helpful information. Issues are presented as fairly and objectively as possible with strengths and weaknesses of particular interpretations fully discussed.

The Comprehensive Guide to Science and Faith William A. Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05

Science and Faith Can and Do Support Each Other. Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design. With this comprehensive resource that includes the latest research you will witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator. Featuring more than 45 entries by top caliber experts you will better understand how scientific concepts like intelligent design are supported by evidence, the scientific findings that support the history and accounts found in the Bible, the biases that lead

to scientific information being presented as a challenge rather than a complement to Christianity Whether you re looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth

The Rhetoric of RHETORIC Wayne C. Booth,2009-02-09 In this manifesto distinguished critic Wayne Booth claims that communication in every corner of life can be improved if we study rhetoric closely Written by Wayne Booth author of the seminal book *The Rhetoric of Fiction* 1961 Explores the consequences of bad rhetoric in education in politics and in the media Investigates the possibility of reducing harmful conflict by practising a rhetoric that depends on deep listening by both sides

Oracles of Science Karl Giberson,Mariano Artigas,2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic

Science of God Kevin J. Sharpe,2006 Is theology responsible to tradition or new insight Institutional church or humanity at large Spiritual or everyday existence Revelation or scientific findings In his new book *Science of God Truth in the Age of Science* Kevin Sharpe proposes a method for doing theology which does not divorce it from the practical applications of science Not only does this work establish that theology ought to be empirical in what it says about the world and God s relationship to it but it also outlines a clear method for doing this Science and theology can each share the same empirical method when each attempts a description of any part of reality it is relying on its own essential assumptions or lens When applied to theology the method assumes the existence of God and then seeks the nature of God using falsifiable and verifiable techniques Starting with the sciences that examine happiness particularly biology genetics psychology and social psychology *Science of God* seeks to understand the spiritual nature of humans and through it the nature of God

shaping Western Civilization this book shows how the Church gave birth to modern science international law the free market economy and much much more

Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution

The Catholic Tradition Thomas Langan, 1998 Langan philosophy U of Toronto examines the history of the Catholic Church and the origins of its teachings since the Church's conception Although committed to the Catholic religion he does not obscure the Church's failings as he lays out the fundamentals of the faith He provides insights into the great Christological councils discusses the differences in the spiritualities of East and West and portrays the crucial roles that the pope and bishops played during the Middle Ages Incorporating the thought of Augustine Aquinas and medieval Catholicism he traces the rise and decline of Christian Europe and the issues raised by reform Annotation copyrighted by Book News Inc Portland OR

For the Glory of God Richard H. Jones, 2012-06-07 For the Glory of God addresses key questions regarding the connection between religion and science Richard H Jones investigates whether ideas from the Bible and Christian theology have played a significant role in the development of modern scientific theories If so has the role always been positive or negative In this regard does religion have the epistemic right to control science or to offer an alternative Christian science to mainstream science Is creationism or intelligent design a science on the same footing with neo Darwinism Is the integrity of science today in danger of religious control In this volume Jones provides an illuminating history of the role of Christian ideas in the physical and biological sciences from the Middle Ages to today He reveals the failure of the popular war and harmony models for the relation of religion and science and shows that a control model does work to explain the complex history of religion and science

God and Nature David C. Lindberg, Ronald L. Numbers, 2023-11-15 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians In eighteen essays prepared especially for this

book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism They explore not only the impact of religion on science but also the influence of science and religion This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship Scholars and general readers alike will find it provocative and readable Since the publication in 1896 of Andrew Dickson White s classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians

God, the Multiverse, and Everything Rodney D. Holder,2017-03-02 Modern cosmology tells us that the universe is remarkably fine tuned for life If the constants of physics or the initial conditions at the Big Bang were different by the smallest of margins then the universe would have been dull and lifeless Why should the universe be so accommodating to life Many cosmologists believe that the existence of many universes can explain why ours is so special In this book Rodney Holder subjects this multiverse hypothesis to rigorous philosophical critique A multitude of problems is exposed Going substantially further than existing treatments Holder argues that divine design is the best explanation for cosmic fine tuning specifically that design by God is a superior explanation in terms of both initial plausibility and explanatory power and is therefore the most rational position to take on the basis of the cosmological data
