Science Centres And Science Events A Science Communication Handbook:

Science Centres and Science Events Anne-Marie Bruyas, Michaela Riccio, 2012-10-30 The idea for this text stemmed from the fruitful experience gathered during the training course of 9 Nigerian university students organized in Naples from 3 to 18 September 2008 by the team of Fondazione IDIS Citt della Scienza under the project Science Centre Owerri The training course turned out to be not only an educational opportunity to acquire knowledge and skills for these students but also a real and practical tool that later led to the realization of the first Science Festival of Owerri in Nigeria in May 2009 This in turn sparked the idea of creating a highly practical handbook for those who want to face the challenge of developing new projects for the dissemination and socialization of science in developing countries In these countries the role of scientific education and training in schools is not sufficient to arouse scientific curiosity among young people and make the population aware of the importance of scientific knowledge in everyday life Moreover science and technology are indispensable tools for people s empowerment and should be supported with actions that encourage curiosity about science and the intelligent use of technology to bridge the divide with developed countries It is therefore necessary to set up activities that are carefully targeted to promote and communicate science The text has been designed as a practical guide to be used in a variety of contexts scientific events or more structured science festivals training the creation of scientific cultural associations and the development of new science centres Besides being an excellent tool for training and supporting the design and planning phases the manual can also be used as a reference work for institutions and local cultural services which have to select projects of this type

The Future of Natural History Museums Eric Dorfman, 2017-10-12 Natural history museums are changing both because of their own internal development and in response to changes in context Historically the aim of collecting from nature was to develop encyclopedic assemblages to satisfy human curiosity and build a basis for taxonomic information Today with global biodiversity in rapid decline there are new reasons to build and maintain collections while

audiences are more diverse numerous and technically savvy Institutions must learn to embrace new technology while retaining the authenticity of their stories and the value placed on their objects The Future of Natural History Museums begins to develop a cohesive discourse that balances the disparate issues that our institutions will face over the next decades It disassembles the topic into various key elements and through commentary and synthesis explores a cohesive picture of the trajectory of the natural history museum sector This book contributes to the study of collections teaching and learning ethics and running non profit businesses and will be of interest to museum and heritage professionals and academics and senior students in Biological Sciences and Museum Studies **The TV Presenter's Career Handbook** Kathryn Wolfe,2014-08-13

Garthe,2022-11-30

The Sustainable Museum is the first book to outline a coherent strategy for the direction of museums as it relates to sustainability in the museum and heritage sector Arguing that museums must place sustainability at the centre of all their activities if they are to become key actors with a clear societal role Garthe considers the issues that museums will likely face as they take on their new roles Presenting case studies from a wide range of museums around the world the book considers different ways of implementing sustainability in different types and sizes of institutions Whilst the book clearly outlines the need for change it also provides guidance about how to change Garthe does this by considering specific concepts and approaches to sustainability in relation to the different aspects of museum operations The book includes a hands on manual for implementing sustainability management in a museum whilst also considering the challenges practitioners will encounter and considering what the future of the sustainable museum

might look like The Sustainable Museum will be essential reading for museum and heritage professionals around the globe The book will also be of interest to academics and students engaged in the study of museums arts and cultural management business administration change management or sustainable development Communicating Science Toss

Laura Bowater, Kay Yeoman, 2012-10-25 Science communication is a rapidly expanding area and meaningful engagement between scientists and the public requires effective communication Designed to help the novice scientist get started with science communication this unique guide begins with a short history of science communication before discussing the design and delivery of an effective engagement event Along with numerous case studies written by highly regarded international contributors the book discusses how to approach face to face science communication and engagement activities with the public while providing tips to avoid potential pitfalls This book has been written for scientists at all stages of their career including undergraduates and postgraduates wishing to engage with effective science communication for the first time or looking to develop their science communication portfolio **Science Cultures in a Diverse World: Knowing, Sharing, Caring**

Bernard Schiele, Xuan Liu, Martin W. Bauer, 2021-09-13 Science and technology culture is now more than ever at the very heart of the social project and all countries to varying degrees participate in it raising scientific literacy improving the image of the sciences involving the public in debates and encouraging the young to pursue careers in the sciences Thus the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture accessible for participation not only to the few who by virtue of their training or trade work in the science and technology fields but to all thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices This book organized on the theme of knowing sharing caring new insights for a diverse world which was derived from the observation that globalization rests upon diversity diversity of contexts publics research strategies and new innovating practices and aims to stimulate exchanges discussions and debates to initiate a reflection conducive to decentring and to be

an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors the challenges they perceive and the potential solutions they consider Thus this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so In this spirit however significant the results presented and shared are less important than the questions they seek to answer How are we to rethink the diffusion the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world What to know What to share How do we do it when science is broken down across the whole spectrum of the world s diversity The book is recommended for those who are interested in science communication and science cultures in the new media era in contemporary social dynamics and in the evolution of the role of the state and of institutions It is also an excellent reference for researchers engaging in science communication public understanding of science cultural studies science and technology museum science society relationship and other fields of humanities and social sciences
