Resources in Education, 2001 **Improbable Scholars** David L. Kirp, 2013-03-12 No school district can be all charismatic leaders and super teachers It can't start from scratch and it can't fire all its teachers and principals when students do poorly Great charter schools can only serve a tiny minority of students Whether we like it or not most of our youngsters will continue to be educated in mainstream public schools The good news as David L Kirp reveals in Improbable Scholars is that there's a sensible way to rebuild public education and close the achievement gap for all students Indeed this is precisely what's happening in a most unlikely place Union City New Jersey a poor crowded Latino community just across the Hudson from Manhattan The school district once one of the worst in the state has ignored trendy reforms in favor of proven game changers like quality early education a word soaked curriculum and hands on help for teachers When beneficial

new strategies have emerged like using sophisticated data crunching to generate pinpoint assessments to help individual students they have been folded into the mix The results demand that we take notice from third grade through high school Union City scores on the high stakes state tests approximate the statewide average In other words these inner city kids are achieving just as much as their suburban cousins in reading writing and math What s even more impressive nearly ninety percent of high school students are earning their diplomas and sixty percent of them are going to college Top students are winning national science awards and full rides at Ivy League universities These schools are not just good places for poor kids They are good places for kids period Improbable Scholars offers a playbook not a prayer book for reform that will dramatically change our approach to reviving public education
