Surgery Jeffrey Norton, R. Randall Bollinger, Alfred E. Chang, Stephen F. Lowry, 2012-12-06 had a dream My dream was to assemble the current and future leaders in surgery and ask them to develop an evidence based surgical textbook that would provide the reader with the most up to date and relevant information on which to base decisions in modern surgical practice In other words the dream was to create the best most comprehensive textbook of surgery Fortunately I met Laura Gillan of Springer Verlag New York who had a similar dream As our editor she has provided the foundation and structure for this dream She has made this dream a reality Because surgery is a highly specialized and diverse discipline with significant complexity I also needed a commitment from outstanding surgeons to serve as coeditors I was fortunate to have a diverse group of exceptional young in spirit energetic cutting edge surgical investigators share in this project and I wish to thank them for their invaluable contribution to this undertaking The Editorial Board including Randy Bollinger Fred Chang Steve Lowry Sean Mulvihill Harvey Pass and Robert Thompson met for the first time at the American College of Surgeons meeting in Chicago in October 1997 Fig 1 There this book was conceived Each of us developed the plan and content for his specific surgical discipline The common thread is that all decisions and recommendations are based on the best available evidence and that the reader can clearly see the evidence in our Evidence based tables specifically marked for the reader's reference

Minimally Invasive Spinal Deformity Surgery Michael Y. Wang, Yi Lu, D. Greg Anderson, Praveen V. Mummaneni, 2014-01-17 Contemporary spinal surgeons whether orthopedic or neurosurgeons are increasingly recognizing minimally invasive spine surgery MISS as a desirable option to manage advanced degenerative diseases MISS techniques minimize blood loss surgical site pain and speed recovery Thus the marriage of MISS with adult

spinal deformity was a natural one Currently the techniques technologies and education of surgeons have finally reached a point where MISS deformity surgeries are becoming commonplace Nevertheless the field is young enough that no comprehensive texts have addressed the unique challenges faced by surgeons exploring this evolving field This book will fill the gap Mind in Art Charles M. Dorn,1999-02-01 This book is for the reader who believes that thinking about and making art is intelligent behavior and that art as a subject in the K 12 school curriculum should not be used as an alibi for other curricular objectives It examines and makes explicit those cognitive behaviors normally associated with most higher order thinking and problem solving activity and explains how they function in the act of creative forming Its goal is ultimately to find ways to use these behaviors in the construction of an intelligent art curriculum for K 12 American schools This is perhaps the only text in the field designed to assist teachers in meeting the challenges of teaching in the Goals 2000 curriculum and evaluation reform effort acquainting them with both the National Art Standards and with the assessment processes needed in order for them to become accountable Mind in Art grapples with current and relevant theory research and unsolved problems It is cohesive as it attempts to bring together information that is only partially known even among those who are college professors And it takes a critical look at the ideas and points of view that have created divisiveness and shabby thinking in the field In this book Charles Dorn significantly advances thinking in the field of art education
