Peters, 1958 *The Publishers' Trade List Annual*, 1980 **Plant Design and Economics for Chemical Engineers** Max S. Peters, Klaus D. Timmerhaus, 1980 The fifth edition of *Plant Design and Economics for Chemical Engineers* is a major revision of the popular fourth edition. There are new chapters on process synthesis, computer aided design, and design of chemical reactors. A traditionally strong feature of the text, economic analysis, has been revamped and updated. Another strength, equipment sizing and cost estimation, is updated and expanded as well. These improvements also reflect changes in equipment availability. The numerous real examples throughout the book include computer or hand solutions and often both. There is a new increased emphasis on computer use in design, economic evaluation, and optimization. Concepts, strategies, and approaches to computer use are featured. These concepts are not tied to particular software programs and therefore apply to a wide range of applications, software of both current and future release. This widely used text is now more useful than ever, providing a one stop guide to chemical process design and evaluation. *Plant Design and Economics for Chemical Engineers* Max S. Peters, Klaus D. Timmerhaus, 1991 A revision of the classic text, reference for the chemical engineering design course usually offered to all Chemical Engineers at the junior senior level. This new edition contains the latest cost data as well as new emphasis on safety and HAZOPs and a new chapter on Computer Aided Design. The book nicely balances both economics, cost estimating, and cost data and process equipment design in one text. *Oil & Gas Processing Plant Design* Mr. Rohit Manglik, 2024-01-27 EduGorilla Publication is a trusted name in the education sector, committed to empowering learners with high quality study materials and resources.
