markets of Austria and Central and Eastern Europe While the investors manage real estate portfolios and have to deal with particular legal systems regulations and norms they often appoint service providers who have a comprehensive understanding of the local context This work aims to highlight that this relationship between the real estate market actors creates an information asymmetry that may constitute the basis of conflicts of interest as well as Principal Agent problems Furthermore the work underlines that the services provided by appraisers and real estate brokers to investors may strongly influence the profit the investor can generate from a transaction It could be therefore inferred that the investor inclines towards a certain type of result from a service provider over the others The present research has revealed that the investors are guided by certain interests and undertake to steer the service providers in a favoured direction This book is essential reading for anyone interested in the nuances of Behavioural Economics and real estate **Philip Payton** Kevin

McGruder,2021-07-06 At the turn of the early twentieth century Harlem the iconic Black neighborhood was predominantly white The Black real estate entrepreneur Philip Payton played a central role in Harlem s transformation He founded the Afro American Realty Company in 1903 vowing to vanquish housing discrimination Yet this ambitious mission faltered as Payton faced the constraints of white capitalist power structures In this biography Kevin McGruder explores Payton s career and its implications for the history of residential segregation Payton stood up for the right of Black people to live in Harlem in the face of vocal white resistance Through skillful use of print media he branded Harlem as a Black community and attracted interest from those interested in racial uplift Yet while Payton opened Harlem streets his business model depended on continued racial segregation Like white real estate investors he benefited from the lack of housing options available to desperate Black tenants by charging higher rents Payton developed a specialty in renting all Black buildings rather than the integrated buildings he had once envisioned and his personal successes ultimately entrenched Manhattan s racial boundaries McGruder highlights what Payton s story shows about the limits of seeking advancement through enterprise in a capitalist system deeply implicated in racial inequality At a time when understanding the roots of residential segregation has become increasingly urgent this biography sheds new light on the man and the forces that shaped Harlem Value Investing in Real Estate Gary W. Free-Market Champions Alistair Bryson,2016-06-22 Is economics a science as many of its exponents claim This author completely rejects such claims and locates much if not all of the theories in current economics to straightforward mysticism Using this approach and the observations of many of the towering historical figures from within the discipline he explores the avenues and results such mysticism has achieved throughout the ages But if economics is not a science it remains much more than a topic for after dinner conversation in the clubs of informed intellectuals The application of informed common sense mainly the informed common sense of John Maynard Keynes previously led society to the achievement of undreamed of societal affluence It is contended that it is primarily the contemporary neglect of this gentleman s perspectives and the re newed substitution of these by centuries old theories which has led us to the contemporary economic chaos generated by the figures described as free market champions The book therefore ends with a plea for us to return to the Keynesian perspectives whose application proved to be so beneficial to society at large The book is in no way intended as a text book on economics it is rather a story woven from the economic discipline
