Godey's Lady's Book ,1844 *The Sandbox Investment* David L. Kirp,2009-06-30 Listen to a short interview with David L Kirp Host Chris Gondek Producer Heron Crane The rich have always valued early education and for the past forty years millions of poor kids have had Head Start Now more and more middle class parents have realized that a good preschool is the smartest investment they can make in their children s future in a competitive world As *The Sandbox Investment* shows their needs are key to the growing call for universal preschool Writing with the verve of a magazine journalist and the authority of a scholar David L Kirp makes the ideal guide to this quiet movement He crouches in classrooms where committed teachers engage lively four year olds and reveals the findings of an extraordinary longitudinal study that shows the life changing impact of preschool He talks with cutting edge researchers from neuroscience and genetics to economics whose findings increasingly show how powerfully early childhood shapes the arc of children s lives Kids first politics is smart economics paying for preschool now can help save us from paying for unemployment crime and emergency rooms later As Kirp reports from the inside activists and political leaders have turned this potent idea into campaigns and policies in red and blue states alike *The Sandbox Investment* is the first full story of a campaign that asks Americans to endorse a vision of society that does well by doing good For anyone who is interested in politics or the social uses of research for anyone who s interested in the children s futures it s a compelling read

Mathematical Subjects Fiona Walls,2009-08-10 Teaching and learning mathematics is a political act in which children teachers parents and policy makers are made visible as subjects As they learn about mathematics children are also learning about themselves who they are who they might become We can choose to listen or not to what children have to say about learning mathematics Such choices constitute us in relations of power Mathematical know how is widely regarded as essential not only to the life chances of individuals but also to the health of communities and the economic well being of nations With the globalisation of education in an increasingly market oriented world mathematics has received intensified attention in the first decade of the twenty first century with a shifting emphasis on utilitarian aspects of mathematics This is reflected in the reconceptualisation of mathematical competence as mathematical literacy loosely conceived as those ways of thinking reasoning and working mathematically that allow us to engage effectively in everyday situations in many occupations and the cut and thrust of world economies as active empowered and participatory citizens It is no surprise then that mathematics has become one of the most politically charged subjects in primary school curricula worldwide We are experiencing an unprecedented proliferation of regional and national strategies to establish benchmarks raise standards enhance achievement close gaps and leave no child behind in

mathematics education Industries have sprung up around the design administration and monitoring of standardised assessment to measure and compare children s mathematical achievement against identified benchmarks and each other
