The Roles of Technology and Globalization in Educational Transformation Adeoye, Blessing F., Arome, Gladys, 2019-08-16
The emergence of the internet and developments in educational software have changed the way teachers teach and the way students learn. There has been a substantial increase in the quantity, quality, and diversity of educational material available over the internet or through the use of satellite video and audio linkups. These technologies have allowed new learning methods and techniques to reach a greater geographic region and have contributed to the global transformation of education. *The Roles of Technology and Globalization in Educational Transformation* is an essential academic book that provides comprehensive research on issues concerning the roles of technology and globalization in educational transformation and the challenges of teaching and learning in various cultural settings and how they were resolved. It will support educational organizations that wish to find, create, or adapt technology for use in their institution. Featuring a broad range of topics such as public administration, educational technology, and higher education, this book is essential for teachers, deans, principals, school administrators, IT specialists, curriculum developers, instructional designers, higher education staff, academicians, policymakers, researchers, and students.

Crafting History Albena Yaneva, 2020-11-15
What constitutes an archive in architecture? What forms does it take? What epistemology does it perform? What kind of craft is archiving? *Crafting History* provides answers and offers insights on the ontological granularity of the archive and its relationship with architecture as a complex enterprise that starts and ends much beyond the act of building or the life of a creator. In this book, we learn how objects are processed and catalogued, how a classification scheme is produced, how models and drawings are preserved, and how born-digital material battles time and technology obsolescence. We follow the work of conservators, librarians, cataloguers, digital archivists, museum technicians, curators, and architects, and we capture archiving in its mundane and practical course. Based on ethnographic observation at the Canadian Centre for Architecture and interviews with a range of practitioners, including Ivar Siza and Peter Eisenman, Albena Yaneva traces archiving through the daily work and care of all its participants, scrutinizing their variable ontology, scale, and politics. Yaneva addresses the strategies practicing architects employ to envisage an archive-based future and tells a story about how architectural collections are crafted so as to form the epistemological basis of architectural history.
