*Political Economy and Religion* Gilbert Faccarello, 2020-04-28 Ever since Antiquity, reflections about economic problems have always been intertwined with questions relating to politics, ethics, and religion. From the 18th century onwards, economic thought seemed to have been gradually disentangled from any other field and to have gained the status of an autonomous scientific discipline, especially with the later use of mathematics. In fact, the growth of economic knowledge never broke off any ties with these other fields and especially with religion and ethics, even though the links with them became less obvious; they only changed shape. This is what this book illustrates, each chapter dealing with different periods and authors from the Middle Ages to the present times. Focusing in turn on the thought of the Scholastics, Ibn Rushd, Averroes, John Calvin, the French liberal Jansenists, Dugald Stewart, David Ricardo, Henri de Saint-Simon, Charles de Caux, and French Christian Political Economy, Auguste Comte, and mile Durkheim, Henry Sidgwick, Arthur Cecil Pigou, and finally John Maynard Keynes, the studies collected here show how religious themes played an important role in the development of economic thought.
