► **W H A T** The *CORE Phonics Survey* and the *CORE Spanish Phonics Survey* assess the phonics and phonics-related skills that have a high rate of application in beginning reading. Each survey presents a number of lists of letters and words for the student to identify or decode. Pseudowords, or made-up words, are included since the student must use decoding skills to correctly pronounce these words and cannot have memorized them.

The *CORE Phonics Surveys* can be used as screening measures, and also as outcome measures, providing data about growth and mastery at the end of an instructional period. As diagnostics, they can indicate whether or not a student needs instruction in selected phonics concepts, or if further assessment is needed. They may also be used to track progress from earlier skills to grade level mastery. The *CORE Phonics Surveys* are not meant to replace screening and progress monitoring tests such as those from AIMSweb or DIBELS, or other CBM tests that may already be in place but can be used to augment such tests.

► **W H Y** A student's ability to use knowledge of sound/letter correspondences (phonics) to decode words determines, in large measure, his or her ability to read individual words. A detailed assessment of a student's phonics skills points to areas in which the student is likely to benefit most from systematic, explicit phonics instruction. Also, knowing the skills that the student does possess will help in selecting reading tasks that offer the most effective reinforcement of those skills.
