Report Card on British Columbia's Elementary Schools 2010, *The School Voucher Illusion* Kevin Welner, Gary Orfield, Luis A. Huerta, 2023 This authoritative book examines the long standing campaign that resulted in today's school voucher policies Advocates of private school vouchers promulgated a vision of service to low income families students of color and other marginalized student populations Vouchers were sold as a way to advance civil rights But as voucher policies grew in size and became an element of Republican orthodoxy they evolved into subsidies for a broad swath of advantaged families with minimal antidiscrimination protections The approach also transmuted into forms like education savings account programs and vouchers funded through tax credited donations In this book scholars and national experts untangle this complex story to show how law and policy have aligned to dramatically alter the likely future of American schooling They offer recommendations for modifying current policies with the goal of capturing more of the originally stated vision of voucher programs equitable access to quality schooling protection of all students civil rights and advancement of the wider societal goals of a democratic educational system Book Features Shows how a fast growing policy is transforming education in the United States in ways that are very different from how that policy was sold to the public Sets the stage with a discussion of the history and legal dimensions of voucher battles as well as the politics of policy change Examines the basic structure of contemporary private schooling the Southern history of vouchers and the key federal court decisions that have opened the door to an explosion of state legislation Offers profiles of voucher policies in two states that have made the largest efforts to support vouchers as well as the only nationally funded program in the nation's capital Edited by three scholars with extensive experience in the study of school choice with chapters by national experts who have produced seminal work in the field

Visions of Schooling Rosemary C. Salomone, 2008-10-01 DIVAt no time in the past century have there been fiercer battles over our public schools than there are now Parents and educational

reformers are challenging not only the mission content and structure of mass compulsory schooling but also its underlying premise that the values promoted through public education are neutral and therefore acceptable to any reasonable person In this important book Rosemary Salomone sets aside the ideological and inflammatory rhetoric that surrounds today s debates over educational values and family choice She offers instead a fair minded examination of education for democratic citizenship in a society that values freedom of conscience and religious pluralism And she proposes a balanced course of action that redefines but does not sever the relationship between education and the state Salomone demonstrates how contemporary conflicts are the product of past educational and social movements She lays bare some of the myths that support the current government monopoly over education and reveals how it privileges those of economic means Through a detailed case study of recent controversy in a suburban New York school district the author explores the legal and policy issues that arise when widely disparate world views stand in the way of political compromise on educational materials techniques and programs Salomone builds a case for educational governance that places the developmental needs of the child at the center of family autonomy She advances a plan that respects diverse values and visions of schooling while preserving the core commitments that bind our nation div

The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover

The Public School Advantage Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07

Nearly the whole of America's partisan politics centers on a single question Can markets solve our social problems And for years this question has played out ferociously in the debates about how we should educate our children From the growth of vouchers and charter schools to the implementation of No Child Left Behind policy makers have increasingly turned to market based models to help improve our schools believing that private institutions because they are competitively driven are better than public ones With *The Public School Advantage* Christopher A and Sarah Theule Lubienski offer powerful evidence to undercut this belief showing that public schools in fact outperform private ones For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education including vouchers and charter schools but much of these data are now nearly half a century old Drawing on two recent large scale and nationally representative databases the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support After correcting for demographics the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones Even more surprising they show that the very mechanism that market based reformers champion autonomy may be the crucial factor that prevents private schools from performing better Alternatively those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care *The Public School Advantage* offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public

Sweden and the United States with efforts to build strong and equitable public education systems as exemplified by Cuba Finland and Canada The pairs of case studies that follow examine the historical evolution of education within an individual country and compare and contrast national educational outcomes A concluding chapter dissects the educational outcomes of the differing economic and governance approaches as well as the policy implications
