Essays on Peripheral Nerve Repair and Regeneration Stefano Geuna, Pierluigi Tos, Bruno Battiston, 2009-08-10

Interest in the study of peripheral nerve repair and regeneration has increased significantly over the last twenty years and today the number of nerve reconstructions performed is progressively increasing due to the continuous improvement in surgical technology and to the spread of microsurgical skills among surgeons worldwide This volume of International Review of Neurobiology provides an overview of the state of the art knowledge in peripheral nerve repair and regeneration by bringing together a number of reviews that critically address some the most important issues in this biomedical field

Surgical Treatment of Peripheral Neuropathic Pain, Peripheral Nerve Tumors, and Peripheral Nerve Injury

Hui Lu, Shizhang Ling, Lei Xu, 2023-09-12 *New advances in the field of nerve regeneration* Hui Lu, Wenchuan Zhang, Shizhang Ling, Bo-Zong Shao, Olga Aleinikova, Xiaofeng Yang, 2025-02-17 Nerve regeneration refers to the regeneration or repair of nerve tissue cells or cell products This mechanism may include the production of new neurons glia axons myelin sheaths or synapses Nerve regeneration is clinically important because it is part of the pathogenesis of many diseases Due to the high incidence of nerve damage nerve regeneration and repair are becoming a rapidly developing field The peripheral nervous system PNS and central nervous system CNS are involved in different functional mechanisms The peripheral nervous system has the intrinsic ability to repair and regenerate while the central nervous system largely lacks the ability to repair and regenerate itself Theories about nervous system regeneration still need to be studied Much research is still needed to optimize the environment to realize the regenerative potential of nerves

Hernia Repair Sequelae Volker Schumpelick,Robert J. Fitzgibbons,2010-03-10 Even the best hernia repair can result in postoperative difficulties for the patient caused by repair sequelae as for example pain infertility infection adhesion and dislocation of the protheses That can happen many years later and now where the general principle of hernia repair is well understood all over the world these sequelae are noticed more and more To define them to evaluate the absolute and relative risk of these sequelae and to describe the ways of their prevention diagnosis and treatment the 5th Suvretta meeting had focussed on this subject We discussed if there s a principle risk by technique material or both The results of these discussions and the future handling and evaluation of this problem was the aim of this meeting Even the best method can be made better by optimization of its single components Even the best hernia repair can result in postoperative difficulties for the patient caused by repair sequelae such as pain infertility infection adhesion and dislocation of the prostheses This can happen many years later and now that the general principle of hernia repair is broadly understood all over the world these sequelae are being noticed more and more The 5th Suvretta meeting was held in order to define these sequelae to evaluate the absolute and relative risks they pose and to discuss the methods of their prevention diagnosis and treatment We discussed whether the principal risk was related to technique material or both This discussion and the future approach to and evaluation of this problem were the aims of the meeting working on the premise that even the best method can be made better by optimizing its individual components

7th International Symposium on Peripheral Nerve Regeneration: Peripheral Nerve Regeneration - Advances and New Directions Rui Alvites,Óscar Darío García García,2025-10-21 Peripheral nerve injury is a common occurrence in both humans and animals

and its consequences are highly debilitating physically physiologically and psychologically Peripheral nerves have a limited capacity to regenerate after injuries the prognosis is often poor and long term motor and sensory impairments are common Despite the various advances made in recent years in different lines of research there are still no known therapeutic solutions that guarantee full functional recovery after injury and traditional surgical approaches continue to be the gold standard The objective of this Research Topic integrated in the ISPNR 2024 is to group high quality research articles and review articles that encompass recent relevant advances in peripheral nerve regeneration after injury both in a basic and translational research approach We invite researchers to submit their original research and literature review articles which encompass new therapies in fields as diverse as cell based Therapies Biomaterials Gene Therapies Paracrine Therapies Nutritional Therapies Conservative Therapies and Computational Research new or improved functional and imaging assessment methods and histomorphometric assessment methodologies
