

How will science and technology change your lives in the future?

3 pages | 564 words

Ans The role of Modern Technology and Science is increasing and has major impact on day-to-day lives of today's people, as it will in the future. One way or another, advancements in Science and Technology are affecting people all around the world, in New York and in an unknown place in Africa. Technology affects people's lives by improving medicines, provides better treatment for diseases and insures a longer life. It improves transportation by helping people move from one corner of the world to other in hours by using transportation services such as Airways, Railways, or even Bus Transportation. Modern Technology changed people's lifestyle and the way they live. For example, now it's possible to surf Internet on TV, watch programs, pause Live TV, and even playback live shows. Internet surfing is a technology revolution. Because of that technology, a person could know what is happening on the other side of the world, chat with others about different matters and even talk using Instant Messaging Services. Watching TV on computers too is possible. Due to Internet, it is now possible to say that the world is at your fingertips. Recent discoveries and scientific breakthroughs such as Cracking the DNA code and Mapping the Genome may completely change the way people look even before they are born. Parents can change color of their unborn son's eye from blue, black or brown. Diseases that are passed through generations, like diabetes, chronic diseases may be eliminated from the unborn child. Such changes will create a child who is disease free and completely immune from world diseases. This might be helpful, as people would be healthier than before. Due to genetic alteration it maybe possible to extend human life expectancy, therefore an average person may possibly live up to 150 years healthily. These are few and best examples that Modern Technology and Science have greater impact on Human beings and the Earth than anything else mankind has done before. Even though with these many Scientific and Technological advancements, there are huge backdrops and disadvantages, Scientific and Technological advancements are improving our way of life, but in this conquest of knowledge, this advancement is hurting the Earth and also acting in a negative way people live. Development of Nuclear Arsenals is one such example, which could seriously harm Earth's environment. Chernobyl blast is the best example of how these Nuclear Plants could lead to death of millions of lives now and in the future. Use of chemical and destructive weapons might one day bring the world to a dead end where there is no more humanity because of people's quest for knowledge. Other matters of concern are continuous use of limited resources such as oil and coal, and increase in pollution in atmosphere due to these minerals. Therefore, Scientific Advancements may also make the world worse. If after 10 years, Genetic Mutation is made possible to extend life expectancy, people will live longer and death rate will decrease thus creating a serious problem where more resources will consumed and lead to eventual destruction of forests and natural habitats to make way for people. Therefore, Scientific and...

Science And Future Essay:

Science and a Future Life with Other Essays Frederic William Henry Myers,1893 Science and a Future Life Frederic William Henry Myers,1893 **A Sense of the Future** Jacob Bronowski,1977 Jacob Bronowski truly educated an enormous number of members of that diffuse population usually referred to with a hint of condescension as educated laymen through his widely shared television series on the concepts of science and through such books as *The Identity of Man* and *The Ascent of Man* This volume extends the process to a further level of insight and it may be more than suggestive that its final essay is entitled *The Fulfillment of Man* Bronowski felt that if human beings are taken seriously they can be led to respond to serious and difficult subjects that relate to the deepest aspects of nature both beyond and within themselves *A Sense of the Future* is a collection of essays that can be read independently as self contained delimited presentations the book is more than the sum of these individual essays it is a unified whole in which Bronowski s most abiding concerns are interrelated juxtaposed and tested for consistency in various intellectual contexts The major unifying theme of the work is the intensely creative and human nature of the scientific enterprise its kinship at the highest levels of individual achievement with comparable manifestations of the artistic imagination and its ethical imperatives evolved within the community of scientists over the centuries which both embody and forge the values of civilized life at large Still the book s diversity of topics is as striking as the unity of its aim Among the subjects within the realm of Bronowski s mind that are presented here are the limitations of formal logic and experimental methods the epistemology of science the distinctive nature of human language and the human mind and the bases of biological and cultural evolution Bronowski also contrasts the findings of science as the here and now of man s understanding with the ongoing activity of science as the open ended search for truth and he undertakes to demonstrate that the factual individual is and the ethical societal ought can be derived each from the other From jacket *Future Science* Max Brockman,2011-10-13 Eighteen of the top young scientists at work today present for the lay reader the latest developments in the fields of evolutionary psychology neuroscience genetic engineering and climate science The Future of Political Science Gary King,Kay L. Schlozman,Norman Nie,2009-03-15 This book contains some of the newest most exciting ideas now percolating within political science One hundred authors each contribute a brief essay about a single novel or insufficiently appreciated idea on some aspect of political science *Artificial Intelligence in Science Challenges, Opportunities and the Future of Research* OECD,2023-06-26 The rapid advances of artificial intelligence AI in recent years have led to numerous creative applications in science Accelerating the productivity of science could be the most economically and socially valuable of all the uses of AI *Science Fiction and the Prediction of the Future* Gary Westfahl,Wong Kin Yuen,2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre s predictions and breaks new ground by considering the prophetic functions of science fiction films as

well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith 2001 A Space Odyssey and its sequels Japanese anime and Hong Kong cinema and electronic fiction *Science and Culture, and Other Essays* Thomas Henry Huxley,1882 **Science and the Future of Mankind** Hugo Boyko,2013-11-21

Engineering Science and Technology: Innovations for the Future Reeja S. R.,Bore Gowda,Y. S. Rammohan,Ganesan Prabu Sankar,G. Jayalatha,2025-10-22 The International Conference on Recent Innovations in Engineering Science Technology ICRIET 2025 hosted by KSIT Bengaluru brought together researchers and experts from around the world to present 225 peer reviewed papers across four engineering domains With keynote sessions on AI energy harvesting and sustainable manufacturing the conference promoted interdisciplinary dialogue and cutting edge innovation It served as a dynamic platform for academic exchange fostering collaboration between academia and industry ICRIET 2025 stands as a testament to KSIT s commitment to advancing research and technological progress **Narrative Strategies in Science Fiction and Other Essays on Imaginative Fiction** Brian Stableford,2009-11-01 Eight essays on science fiction and fantasy Narrative Strategies in Science Fiction Immortality in Science Fiction Why There Is Almost No Such Thing as Science Fiction Perfectibility and the Novel of the Future In Search of a New Genre Ecology and Dystopia Cosmic Horror and Growing Up as a Superhero Complete with bibliography and index The Future of Science Ernest Renan,1891 **Science Fiction** Patrick Parrinder,2013-10-08 First Published in 2002 This volume is about Science Fiction its criticisms and teaching and covers the rise of science fiction as a study and genre looking at the work of H G Wells and the themes of epic fable language cultures its sociology as a romance and of a working daydream *A series of seven essays on Universal Science, embracing some investigations of the Mosaic Cosmogony, and the interpretation of the Scriptures, with the object of proving their scientific exactness* Thomas Clark WESTFIELD,1863 **A series of seven essays on universal science** Thomas Clark Westfield,1863 **Science, Development and the Future** A. O. Anya,1982 **Science Fiction Film, Television, and Adaptation** J. P. Telotte,Gerald Duchovnay,2011-08-02 The book examines the difficulty of adapting from one screen medium to another by looking at both successful and unsuccessful efforts in the area of science fiction Those difficult efforts at moving from film to TV and from TV to film reveal much about the technologies involved and this highly technological genre as well **Humboldt library of science. no. 2, 1880** ,1880 *Edging Into the Future* Veronica Hollinger,Joan Gordon,2002-04 The savvy critical essays in this provocative collection investigate the interface between science fiction and postmodern culture Highly recommended for readers at all levels Choice **Collected Essays: Science and education** Thomas Henry Huxley,1898
