Science Et Pouvoir Dans La Tunisie Contemporaine:

Science et pouvoir dans la Tunisie contemporaine François Siino, 2004-01-01 Dans l'indépendance tunisienne la science a été fortement mobilisée dans les discours des pouvoirs politiques. Elle est présente comme la condition du développement économique, la voie d'une émancipation générale du peuple, la garantie de l'indépendance et de la puissance du nouvel état. Mais les conditions socio-historiques de la naissance d'une pratique scientifique en Tunisie ont conforté la mise en actes de ce discours un caractère ambigu. Tout d'abord l'Université, lieu de l'éclosion de la recherche scientifique depuis les années 1960, est devenue après un court état de grâce le symbole d'une contestation politique virulente, notamment islamiste, à partir des années 1980. Ensuite les premières générations de scientifiques tunisiens marquées lors de leur formation l'étranger par les valeurs de l'universalisme scientifique ont traversé la pratique scientifique et l'ouverture d'un espace de débat critique. C'est cette tension entre les représentations politiques de la science et les conditions sociales de sa pratique que tente d'analyser cet ouvrage centré sur la période cruciale des quarante ans qui précèdent l'adoption en 1996 d'un cadre législatif pour la recherche scientifique en Tunisie. Il montre comment les politiques scientifiques mises en œuvre reflètent un rapport ambigu des pouvoirs politiques tunisiens à la science et peut-être plus encore aux savants. Et comment dans la période la plus récente la tentative de concilier libéralisation économique et maintien d'un ordre politique centralisé et autoritaire ne laisse aux scientifiques d'autre alternative que d'être marginalisés ou tout au moins agrégés à l'appareil d'état sous prétexte d'efficacité. C'est dire dans les deux cas hors d'état d'agir sur les orientations de leur pratique. *Sciences et pouvoir dans la Tunisie contemporaine*

Decolonizing 1968 Burleigh Hendrickson,2022-11-15 Decolonizing 1968 explores how activists in 1968 transformed university campuses across Europe and North Africa into sites of contestation where students administrators and state officials collided over definitions of modernity and nationhood after empire Burleigh Hendrickson details protesters versions of events to counterbalance more visible narratives that emerged from state controlled media centers and ultimately describes how the very education systems put in place to serve the French state during the colonial period ended up functioning as the crucible of postcolonial revolt Hendrickson not only unearths complex

connections among activists and their transnational networks across Tunis Paris and Dakar but also weaves together their overlapping stories and participation in France s May 68 Using global protest to demonstrate the enduring links between France and its former colonies Decolonizing 1968 traces the historical relationships between colonialism and 1968 activism examining transnational networks that emerged and new human and immigrants rights initiatives that directly followed As a result Hendrickson reveals that 1968 is not merely a flashpoint in the history of left wing protest but a key turning point in the history of decolonization Thanks to generous funding from Penn State and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

The Colonial Origins of Modern Social Thought George

Steinmetz,2025-02-25 A new history of French social thought that connects postwar sociology to colonialism and empire In this provocative and original retelling of the history of French social thought George Steinmetz places the history and development of modern French sociology in the context of the French empire after World War II Connecting the rise of all the social sciences with efforts by France and other imperial powers to consolidate control over their crisis ridden colonies Steinmetz argues that colonial research represented a crucial core of the nascent academic discipline of sociology especially between the late 1930s and the 1960s Sociologists who became favored partners of colonial governments were asked to apply their expertise to such social problems as detribalization urbanization poverty and labor migration This colonial orientation permeated all the major subfields of sociological research Steinmetz contends and is at the center of the work of four influential scholars Raymond Aron Jacques Berque Georges Balandier and Pierre Bourdieu In retelling this history Steinmetz develops and deploys a new methodological approach that combines attention to broadly contextual factors dynamics within the intellectual development of the social sciences and sociology in particular and close readings of sociological texts He moves gradually toward the postwar sociologists of colonialism and their writings beginning with the most macroscopic contexts which included the postwar reoccupation of the French empire and the turn to developmentalist policies and the resulting demand for new forms of social scientific expertise After exploring the colonial engagement of researchers in sociology and neighboring fields before and after 1945 he turns to detailed examinations of the work of Aron who created a sociology of empires Berque the leading historical sociologist of North Africa Balandier the founder of French Africanist sociology and Bourdieu whose renowned theoretical concepts were forged in war torn late colonial Algeria
