

Middle School Science Lab Report Guidelines

- I. **Question/Problem:** A scientific question written to tell how the factor you change (**independent variable**) affects your results.
 - ex. What is the effect of the amount of sunlight on the height of African violet plants?
 - ex. What is the relationship between the angle of a ramp and the speed of a car?
- II. **Background Research:** research about the topic. Helps you to make your hypothesis. (Optional)
- III. **Hypothesis** – a prediction of what you think the answer to the question will be (written as an "If ..., then..." statement)
 - ex. If the amount of sunlight increases, then the plant height increases.
 - or- If the the amount of sunlight increases, then the plant height decreases.
 - ex. If the angle of a ramp increases, then the speed of the the car increases.
 - or- If the angle of a ramp increases, then the speed of the car decreases.
- IV. **Materials:** a list of the supplies that you needed to test your hypothesis – needs to be specific; include **how many** and **how much**
- V. **Procedure:** step-by-step explanation of how to test the hypothesis
(**steps should be numbered and listed – not in paragraph form**)
- VI. **Observations:** the data you collect; observations (*qualitative and quantitative*) you make by hearing, smelling, tasting, feeling, and seeing (including measurements)
 - Use **tables, graphs, charts, pictures, etc.** to make data easier to read
- VII. **Conclusion:** (written in paragraph form)
 1. Restate your hypothesis and tell whether or not your data supports it.
 2. Answer the question to the problem using your data. Include specific data with your answer. (ex. average heights of plants in cm)
 3. Share any problems you encountered while conducting the experiment.
 4. Identify changes you could make next time.
 5. Your reflections about the experiment

Ex. If the amount of sunlight increases, then African violet plant height increases. The data supported my hypothesis. The plants that received more sunlight grew an average of 2.5cm more than the plants that received less sunlight. If this experiment was done again, we could study different types of plants. From this experiment I learned the best conditions in which to grow African Violet plants.

Science Lab Report Example Middle School

Science Lab Report Example Middle School:

Help! I'm Teaching Middle School Science C. Jill Swango, Sally Boles Steward, 2003 Like your own personal survival guide Help IOCom Teaching Middle School Science is a nontechnical how to manualOCoespecially for first year teachers But even veteran teachers can benefit from the plentiful ideas examples and tips on teaching science the way middle schoolers learn best The book covers all the basics what to do on the first day of school including icebreaker activities preparing safe and effective lab lessons managing the classroom working with in school teams as well as parents But its practicalOCOand encouragingOCOapproach doesnOCOt mean it shortchanges the basics of effective pedagogy YouOCOll learn how to handle cooperative learning and assessment how to help students write effectively and the importance of modeling for early adolescents

America's Lab Report National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2006-01-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined What do they contribute to science learning What can they contribute to science learning What is the current status of labs in our nation s high schools as a context for learning science This book looks at a range of questions about how laboratory experiences fit into U S high schools What is effective laboratory teaching What does research tell us about learning in high school science labs How should student learning in laboratory experiences be assessed Do all student have access to laboratory experiences What changes need to be made to improve laboratory experiences for high school students How can school organization contribute to effective laboratory teaching With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be Science educators school administrators policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished
