

A SCIENCE FICTION STORY

A typical day in the year 2110

Life in the year 2110 is very fast, but easy to be carried on. Technology has developed very interesting machines to help people, but we still have some of the same problems our grand-grandparents used to have one hundred years ago.

My name is Stacy and I get up at seven o'clock to get ready to go to my office, which is seventy kilometers away from my house, but traffic jams are still awful, and it takes me ten minutes to fly there. I work six hours a day and I have to be in the office block at eight o'clock.

So, I have a very light breakfast, which consists of tomato juice, cereal, milk, fruits and some scrambled eggs. From time to time I eat some fish, but my doctor has forbidden me to eat it because it causes heart attacks. Then, I chat with my husband, who lives in Tokyo because he leads a very important computer company, called Microsoft, so he comes to California twice a month. We are accustomed to seeing each other very few days a year and I guess that we are still together for that reason. After listening to the news, which changes at an amazing speed, I program my computer, which deals with all the household chores. Mary, as I call her, was a wedding present, and she does the laundry, the shopping and of course, she cleans the entire house. Ten minutes later I start my gym class, and after having a bath, I set out to my office.

My work mates are very nice people and I get on well with all of them. The office work can be very disturbing so we have a very large playing room, where we go when we feel tired.

After my job, I return home, where a very romantic e-mail from my husband is waiting for me. I send him back another e-mail and then I prepare the dinner. When I finish eating, I go to bed and sometimes I watch a film.

I like my life very much, and even though it seems a little bit boring, I enjoy living in the year 2110.
