

Abstract

This experiment tested whether nitrogen affects tomato plant height in a controlled environment. This is because nitrogen is essential for plant growth and was expected to yield taller tomato plants from high levels of nitrogen fertilizer.

All plants grew from seeds, and the results were compared after 50 days. The experiment used three groups: one control group that didn't receive any nitrogen fertilizer and two experimental groups. One experimental group received low levels of nitrogen fertilizer and the other, higher levels.

Using an ANOVA, the plants with higher nitrogen levels were taller. In comparison, those with lower nitrogen levels exceeded the control group. Compared to previous findings and expectations, the effects of nitrogen on plant height were statistically significant.

Report Writing Michelle Reid, 2018-08-02 Practical and concise this is the essential guide to writing effective reports It shows students how to tailor report structures and conventions to different audiences and purposes and how to manage changes in format and requirements so that they have the tools and understanding to write reports with confidence It includes real life examples of student reports to illustrate the features of good report writing and a comprehensive checklist to keep students on track This is an invaluable resource for students of all levels who are required to write reports as part of their course New to this Edition Contains a new section on demonstrating critical analysis in the key parts of a report including the literature review methodology and findings Additional guidance on effective writing style Bibliography on Tungsten, Its Alloys and Compounds ,1960 **LAMS-** ,1960 Nuclear Science Abstracts ,1972

Technical Abstract Bulletin , **Learning to Communicate in Science and Engineering** Mya Poe, Neal Lerner, Jennifer Craig, 2010-02-05 Case studies and pedagogical strategies to help science and engineering students improve their writing and speaking skills while developing professional identities To many science and engineering students the task of writing may seem irrelevant to their future professional careers At MIT however students discover that writing about their technical work is important not only in solving real world problems but also in developing their professional identities MIT puts into practice the belief that engineers who don't write well end up working for engineers who do write well requiring all students to take communications intensive classes in which they learn from MIT faculty and writing instructors how to express their ideas in writing and in presentations Students are challenged not only to think like professional scientists and engineers but also to communicate like them This book offers in depth case studies and pedagogical strategies from a range of science and engineering communication intensive classes at MIT It traces the progress of seventeen students from diverse

backgrounds in seven classes that span five departments Undergraduates in biology attempt to turn scientific findings into a research article graduate students learn to define their research for scientific grant writing undergraduates in biomedical engineering learn to use data as evidence and students in aeronautic and astronautic engineering learn to communicate collaboratively Each case study is introduced by a description of its theoretical and curricular context and an outline of the objectives for the students activities The studies describe the on the ground realities of working with faculty staff and students to achieve communication and course goals offering lessons that can be easily applied to a wide variety of settings and institutions

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such
