Cooper, 2009-11-04 This edition marks the

tenth Middleware conference The first conference was held in the Lake District of England in 1998 and its genesis reflected a growing realization that middleware systems were a unique breed of distributed system requiring their own rigorous research and evaluation Distributed systems had been around for decades and the Middleware conference itself resulted from the combination of three previous conferences But the attempt to build common platforms for many different applications required a unique combination of high level abstraction and low level optimization and presented challenges different from building a monolithic distributed system Since that first conference the notion of what constitutes middleware has changed somewhat and the focus of research papers has changed with it The first edition focused heavily on distributed objects as a metaphor for building systems including six papers with CORBA or ORB in the title In following years the conference broadened to cover publish subscribe messaging peer to peer systems distributed databases Web services and automated management among other topics Innovative techniques and architectures surfaced in workshops and expanded to become themes of the main conference while changes in the industry and advances in other research areas helped to shape research agendas This tenth edition includes papers on next generation platforms such as stream systems pervasive systems and cloud systems managing enterprise data centers and platforms for building other platforms among others Middleware 2009 Jean M. Bacon, Valérie Issarny, Brian F. Cooper, 2009-11-06 This book constitutes the proceedings of the 10th International Conference on Middleware held in Urbana IL USA during November 30 December 4 The 21 papers presented have been selected from 110 submissions The papers are organized in topical sections on communications protocols and optimization service component composition adaption monitoring pervasive stream processing failure resilience and support for testing
