Information: Only four planets in our solar system are made of rock, Mercury, Venus, Earth, and Mars. Temperatures on Mercury and Venus are over 800-degrees Fahrenheit, while Mars sits around negative 100-degrees Fahrenheit. Mercury and Mars have no suitable atmosphere to breathe, while Venus holds an atmosphere so thick in carbon dioxide it would kill humans. The other 4 planets, Jupiter, Saturn, Uranus, and Neptune, are made of gas and cannot support land dwelling.

problem of sentience is drastically different from the problem of consciousness and if you conflate the two you have immediately set yourself an impossible task especially if you make any attempt to solve these problems within the framework of materialism i.e. the ideology of anti mind. To understand what consciousness actually is it's essential to understand the difference in the world of sleep between dreaming and lucid dreaming. Exactly the same dichotomy is present in the waking world. A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness. A conscious version of a sleepwalker engages in what we refer to as lucid waking. Lucid waking is the key to consciousness. The fact is that consciousness is not an inherent property of human individuals. It's not built into them. It's acquired just as some people acquire the ability to become lucid dreamers. Since sleepwalkers could do many of the same things as conscious individuals the question is invited of why consciousness is required at all. If you don't know what consciousness is how can you expand your consciousness to the maximum. Wouldn't you like to be maximally conscious? Think of the power you would have.
