Energy Technology Bela G. Liptak, 2018-10-08 A solution to the climate and energy crisis The reversible fuel cell RFC described in this volume stores solar energy and thereby makes it continuously available This can make the building of energy free homes and all electric transportation a reality The foldout drawing at the back of this book also describes the detailed design of the world's first 1 000 megawatt solar hydrogen power plant How is this possible Our planet receives more solar energy in an hour than humans use in a year In fact 5% of the Sahara could meet the total energy requirement of mankind This energy can then be stored and transported in the form of hydrogen Converting from an exhaustible energy economy to a clean free and inexhaustible one In this timely book author Bela Liptak explains why a solar hydrogen economy is technically feasible and cost effective He first outlines existing conservation technologies and renewable energy processes as well as evolving technologies such as energy free homes roof shingle solar collectors and RFCs He goes on to discuss energy optimization techniques that could reduce the global energy consumption by one third and finally presents the detailed design of a full size solar hydrogen power plant It is time to harness the power of solar energy With global energy consumption quadrupling in the last fifty years and atmospheric carbon dioxide reaching the highest level ever recorded now is the time to prevent further damage to the planet and ensure the survival of human civilization It is debatable how much time we have before our fossil and uranium deposits are exhausted It is also debatable how much climate change we can live with or how much of our economic resources should be devoted to stabilizing and reversing mankind's growing carbon footprint What is not debatable is that our resources are exhaustible and that we must not give reason for our grandchildren to ask Why did you not act in time

Basic Strategy in Context Neil Thomson, Charles Baden-Fuller, 2010-06-01 Basic Strategy in Context centres on real world firms and managers by giving each chapter s cases a higher weighting in importance and explanation than is normal Given this emphasis on real world as opposed to theoretical treatment the book enables the solving of practical business problems like those below This emphasis on reality is cemented by the book s treatment of diversity as being the norm highlighted through European business cases from different countries Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry Often theory and cases are treated as different and separated topics we believe that our integrated didactic treatment is quite unique Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry Here is a sample of specific practical problems to which this book can show solutions Why are resources important and how are they leveraged Using the case of a British failure Railtrack we show the fatal consequences of neglecting existing resources and then in a completely different country and industry Carlo Gavazzi Space in Italy how resources can be utilised from outside the firm to achieve leverage Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment Japan and Carlos

Ghosn But can change be planned Sometimes events or luck sabotage the best intentions as shown in the Samsung case The book differentiates itself from the competition in four ways Cases form the highlight of the book Taking European and some international cases as the starting point the objective is to link themes or topics to a description of their effect on the firm The linkage will occur at the relevant point in the case not in a separate section or in another book The author team has used several longitudinal cases spread over a 15 20 year period The longitudinal cases are supported by some new non longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network We feel such an emphasis on cases is a novel feature The theory is explained using a range of modern didactic methods not usually found in competitive offerings Examples include colour coded and highlighted links from the theory to the case questions inside each theory section with model answers and unanswered questions to test the student s grasp of the concepts The book features a mixture of cases from short specific to academically challenging ones Too often superficial cases are placed at the end of chapters in strategy theory books They are picked to emphasize the topics of the preceding chapters The result is spoon feeding with little need or motivation to provoke individual thought or learning The cases in this book are comprehensive approximately 20 pages in length with ample quantitative and qualitative data thus forcing a modicum of effort from the student Shorter cases are also included for ease of understanding and instructor flexibility Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases
