is based on the process of conceptualization and it is the core of system structuring as well as justification for information systems development. It supports and facilitates the understanding, explanation, prediction and reasoning on information and knowledge and their manipulation in the systems in addition to understanding and designing the functions of the systems. The conceptualization process aims at constructing concepts relevant for the knowledge and information system in question. Concepts in the human mind and concept descriptions in computerized information systems are quite different things by nature but both should be taken into account in conceptual modeling. Usually concept descriptions are properly observed but concepts in the human mind and their properties are often neglected quite carelessly.

This book covers in detail all the most popular performance swaps for Honda Civic Accord and Prelude as well as the Acura Integra.
