**Lynn Margulis** Dorion Sagan, 2012 Tireless controversial and hugely inspirational to those who knew her or encountered her work Lynn Margulis was a scientist whose intellectual energy and interests knew no bounds Best known for her work on the origins of eukaryotic cells the Gaia hypothesis and symbiogenesis as a driving force in evolution her work has forever changed the way we understand life on Earth When Margulis passed away in 2011 she left behind a groundbreaking scientific legacy that spanned decades In this collection Dorion Sagan Margulis's son and longtime collaborator gathers together the voices of friends and colleagues to remark on her life and legacy in essays that cover her early collaboration with James Lovelock her fearless face off with Richard Dawkins during the so called Battle of Balliol at Oxford the intrepid application of her scientific mind to the insistence that 9 11 was a false flag operation her affinity for Emily Dickinson and more Margulis was elected to the National Academy of Sciences in 1983 received the prestigious National Medal of Science in 1999 and her papers are permanently archived at the Library of Congress Less than a month before her untimely death Margulis was named one of the twenty most influential scientists alive one of only two women on this list which include such scientists as Stephen Hawking James Watson and Jane Goodall      Between Remembrance and Repair Claire Whitlinger, 2020-04-28 Few places are more notorious for civil rights era violence than Philadelphia Mississippi the site of the 1964 Mississippi Burning murders Yet in a striking turn of events Philadelphia has become a beacon in Mississippi's racial reckoning in the decades since Claire Whitlinger investigates how this community came to acknowledge its past offering significant insight into the social impacts of commemoration Examining two commemorations around key anniversaries of the murders held in 1989 and 2004 Whitlinger shows the differences in how those events unfolded She also charts how the 2004 commemoration offered a springboard for the trial of former Klan leader Edgar Ray Killen for his role in the 1964 murders

the 2006 passage of Mississippi's Civil Rights Human Rights education bill and the initiation of the Mississippi Truth Project. In doing so, Whitlinger provides the first comprehensive account of these high profile events and expands our understanding of how commemorations both emerge out of and catalyze associated memory movements. Threading a compelling story with theoretical insights, Whitlinger delivers a study that will help scholars, students, and activists alike better understand the dynamics of commemorating difficult pasts, commemorative practices in general, and the links between memory, race, and social change.

*The World's Religions* Peter B. Clarke, Peter Beyer, 2009-05-07 This comprehensive volume focuses on the world's religions and the changes they have undergone as they become more global and diverse in form. It explores the religions of the world not only in the regions with which they have been historically associated but also looks at the new cultural and religious contexts in which they are developing. It considers the role of migration in the spread of religions by examining the issues raised for modern societies by the increasing interaction of different religions. The volume also addresses such central questions as the dynamics of religious innovation, which is evidenced in the rise and impact of new religious and new spirituality movements in every continent.

*The New Psychology of Leadership* S. Alexander Haslam, Stephen D. Reicher, Michael J. Platow, 2025-11-03 This groundbreaking book provides a comprehensive and compelling introduction to the field of leadership that is jam-packed with theoretical and practical insights derived from a wealth of applied scientific research conducted by the authors and their colleagues around the world over the last four decades. The book starts from the premise that leadership is never just about leaders. Instead, it is about leaders and followers who are joined together as members of a social group that provides them with a sense of shared social identity. Leadership is understood as the process through which leaders work with followers to create, represent, advance, and embed this sense of shared social identity. The new edition of this bestselling book captures the breadth and depth of ongoing research from around the world that speaks to the power of social identity as a basis for both effective leadership and engaged followership. This approach is highlighted in case studies from the COVID-19 pandemic and as a way of understanding the rise, fall, and resurgence of Donald Trump. The book also discusses practical applications that show how leaders can create, advance, represent, and embed social identity in ways that are beneficial not only for group engagement and performance but also for health and well-being. Drawing on real-world examples and rich data sources, this book will appeal to academics, researchers, and students of psychology, business, and management, as well as to practitioners, policy makers, and anyone interested in the workings of leadership, influence, and power.

**The Modern Moves West** Richard Cándida Smith, 2012-05-28 In 1921, Sam Rodia, an Italian laborer and tile setter, started work on an elaborate assemblage in the backyard of his home in Watts, California. The result was an iconic structure now known as the Watts Towers. Rodia created a work that was original even though the resources available to support his project were virtually nonexistent. Each of his limitations, whether of materials, real estate finances, or his own education, passed through his creative imagination to become a positive element in his work. In

The Modern Moves West accomplished cultural historian Richard C ndida Smith contends that the Watts Towers provided a model to succeeding California artists that was no longer defined through a subordinate relationship to the artistic capitals of New York and Paris Tracing the development of abstract painting assemblage art and efforts to build new arts institutions C ndida Smith lays bare the tensions between the democratic and professional sides of modern and contemporary art as California developed a distinct regional cultural life Men and women from groups long alienated if not forcibly excluded from the worlds of high culture made their way in staking out their participation with images and objects that responded to particular circumstances as well as dilemmas of contemporary life in the process changing the public for whom art was made Beginning with the emergence of modern art in nineteenth century France and its influence on young Westerners and continuing through to today s burgeoning border art movement along the U S Mexican frontier The Modern Moves West dramatically illustrates the paths that California artists took toward a more diverse and inclusive culture

*The Peace In Between* Astri Suhrke, Mats Berdal, 2013-03 This volume examines the causes and purposes of post conflict violence The end of a war is generally expected to be followed by an end to collective violence as the term post conflict that came into general usage in the 1990s signifies In reality however various forms of deadly violence continue and sometimes even increase after the big guns have been silenced and a peace agreement signed Explanations for this and other kinds of violence fall roughly into two broad categories those that stress the legacies of the war and those that focus on the conditions of the peace There are significant gaps in the literature most importantly arising from the common premise that there is one predominant type of post war situation This post war state is often endowed with certain generic features that predispose it towards violence such as a weak state criminal elements generated by the war time economy demobilized but not demilitarized or reintegrated ex combatants impunity and rapid liberalization The premise of this volume differs It argues that features which constrain or encourage violence stack up in ways to create distinct and different types of post war environments Critical factors that shape the post war environment in this respect lie in the war to peace transition itself above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power normative understandings of the post war order and the international context This book will of much interest to students of war and conflict studies peacebuilding and IR Security Studies in general
