

Components of Professionalism

Professionalism is defined as an individual's performance and manners in a society or environment. It is made up of many different traits and characteristics. Professionalism can be defined by an individual's image, competency, respect for others, communication, and ethics. When an individual wants to present themselves as a professional and wants to be taken seriously, they present themselves high quality and their posture and gestures matter. Also being reliable and accountable can help build the trust between the people and who the individual interacts with.

Another good trait in a professional is having good communication skills and being able to communicate verbal, oral, and written. Finally, having good work ethics is one of the main traits of professionalism. Being able to show determination, dedication and your passion for the work a person does, makes the patients happy, coworkers feeling safe, and supervisors to have someone to rely on and trust. Professionalism can be made up of many traits but image, accountability, communication and good work ethics are very important to achieve to be viewed as a professional.

A professional person should have the appropriate image and body language to be viewed and respected like a professional. Attire must be clean, neat and meet the code of conduct. Also proper grooming and personal hygiene fall into professional image. Image is very important in healthcare environments because it gives the patients a good perspective that if the doctor, nurse, or other medical professional is well taken care of, they are in good hands. Body language also plays a big role in presenting oneself as a professional. Facial expressions, posture and gesture should make the patient feel important, understood and cared for; otherwise, the patient will feel unsafe and fear for the type of care they will be receiving. Therefore, maintaining a professional image and having proper body language, is a good trait to achieve as a professional (Joseph, 2018).

Having great communication and organization skills can help make a good professional. Communication can be verbal, oral or written. When communicating, the tone and language matters and can be misunderstood if not clear enough. When an individual needs to do documentation, they must use the right words, tone, grammar, and clear ideas to be viewed as professional and not mistaken negatively. The way a person communicates may bring their respect up in the environment or their reputation can be ruined. Also having good organization skills is needed. If an individual comes off as messy or unorganized it may show that they are not professional and may not be taken seriously by coworkers, patients and supervisors. Therefore, having great communication skills and organization skills is something a professional must have (Joseph, 2018).

Respect for others is also a great trait for a professional. Being able to treat others with respect, care
