Opening Credit Justin McGowan, Duncan Sankey, 2015-04-08 As a result of prevailing monetary conditions since the global financial crisis the world has witnessed unprecedented growth in global corporate credit markets Yet despite the trillions of dollars put to work in the debt capital markets corporate credit is still an unfamiliar concept to most investors compared to other asset classes such as equities and commodities Every red top newspaper and 24 hour news service is happy to report the latest twitch in the Dow FTSE or Stoxx indices but momentous moves in the iBoxx or iTraxx go unmentioned And whereas many a talking head is happy to pose as an equity analyst few feel comfortable venturing into the arcana of credit Yet the corporate credit market as the authors of this new book show is both materially larger than its equity peer and has shown more attractive risk reward characteristics over the last 90 odd years In Opening Credit career credit professionals Justin McGowan and Duncan Sankey aim to redress this by drawing on their more than 50 years collective experience in the field to elucidate a practitioner s approach to corporate credit investment Whilst explaining the basics of traditional credit analysis and affirming its value McGowan and Sankey also caution against its shortcomings They demonstrate the need both to penetrate the veil of accounting to get to the economic reality behind the annuals and interim numbers and to analyse the individuals that drive them the key executives and board members They employ a range of cogent and easy to follow case studies to illustrate the value of their executive and governance led approach which places management front and centre in understanding corporate credit Opening Credit will appeal to all those seeking a better understanding of corporate credit including analysts looking to develop their skills fund managers especially those with an eye to SRI bankers IFAs financial journalists academics and students of finance **Handbook of College Reading and Study Strategy Research**

Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System Nurcan Kaya,2015-10-27 The Turkish government is urged to make a fundamental shift in its approach to education by Minority Rights Group International MRG in a new report A long standing focus on state building has been supplemented by increasing emphasis on religious teaching Both feature strongly in the education system in Turkey making schools a focus of discrimination The report Discrimination based on Colour Ethnic Origin Language Religion and Belief in Turkey s Education System reveals evidence of discrimination of minority groups and suggests comprehensive reforms to effectively ensure equality The national education system which for decades aimed to create young Turkish nationalists has in recent years become a vehicle for raising young religious Turkish nationalists says Nurcan Kaya Turkey Coordinator of Minority Rights Group International Religious education is compulsory from grade four in primary schools While some information on world religions has been introduced the emphasis remains on teaching Sunni Muslim religious practices Children of Jewish and Christian families may apply to opt out but the process can be cumbersome and in many schools alternatives are not provided for them Non Muslim students who have opted out can still find themselves having to remain in the religious instruction class or alternatively having to wander in the school corridor making them vulnerable to taunts from pupils and even teachers The opt out possibility is still not available to children of other minorities Another issue is mother tongue education In 2012 a new elective on the living languages and dialects in Turkey was introduced but due to various limitations minorities remain marginalised others in the education system Subsequent to the 2012 reform the report monitors discrimination in the formal education system in the period of the academic year of 2014 2015 The findings are based on the field work of the Monitoring

Discrimination in Education Network an alliance of 16 organizations working in Turkey The report compiles numerous cases of discrimination based on language religion ethnicity skin colour and the level of income In order to bring about a fundamental solution to these problems in the education system the government must prioritise developing an approach that sees all groups as equal and that responds to demands for rights based on such an understanding of equality says Kaya The report highlights that Turkey has no anti discrimination law or an equality commission to which victims of discrimination can apply The existing legislation contains no effective and accessible means of judicial remedies or compensation Therefore many discriminatory practices are not reported to school administrations The entire education system is based on Turkishness Non Turkish groups are either not referred to or referred in a negative way says Kaya Education system has played a significant role in deepening conflict in society The positive representation of other groups in the education system would contribute to social peace and harmony In order to resolve the many problems in the education system that the current approach causes the overall aim of government education policy should be cleared of ideological references and the protection of children s best interests and the right to education in line with international standards should be considered its fundamental goal says the report The Net and the Nation State Uta Kohl,2017-05-25 This collection investigates the sharpening conflict between the nation state and the internet through a multidisciplinary lens It challenges the idea of an inherently global internet by examining its increasing territorial fragmentation and conversely the notion that for states online law and order is business as usual Cyberborders based on national law are not just erected around China s online community Cultural political and economic forces as reflected in national or regional norms have also incentivised virtual borders in the West The nation state is asserting itself Yet there are also signs of the receding role of the state in favour of corporations wielding influence through de facto control over content and technology This volume contributes to the online governance debate by joining ideas from law politics and human geography to explore internet jurisdiction and its overlap with topics such as freedom of expression free trade democracy identity and cartographic maps
