Reading Strategies: Making Connections

Making Connections

Good readers relate what they read to other experiences and knowledge.

There are three types of connections:

- Text-to-Self -- connections between the text and the reader's life and experiences
- Text-to-Text -- connections between the text and other books, movies, songs, articles
- Text-to-World -- connections between the text and events in the real world and history

Directions: Record the connection you made while reading. Be sure to include the page or paragraph number.

Types of Connections	Connections I made
Text-to-Self  This reminds me of when I ... I can connect to the book because ... I connected to this when ...	
Text-to-Text  This reminds me of another book I read because ... This part makes me think of ... This is similar to ...	
Text-to-World  This makes me think about ... This part makes me remember ... This is like ...

Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines

Off Track Louise Spear-swerling, 2018-03-05 The identification of poor readers as learning disabled can be the first of many steps toward consigning students to a lifetime of reading failure The very label that is meant to help children often becomes a burden that works against effective learning throughout their schooling In this book the authors identify the dangers of labeling children as reading or learning disabled contending that a reading disability is not a unitary phenomenon In order to diagnose and help children educators and parents need to understand the multiple sources of reading difficulty before they can choose appropriate means to correct it Drawing on recent research in cognitive psychology the authors present a new theoretical model of reading disability that integrates a wide variety of findings across age and grade spans Laid out in terms that are readily comprehensible to parents and practitioners the model outlines the phases that are characteristic of the path to proficient reading then describes four ways in which disabled readers may stray from this path The key to the authors work lies in the fact that youngsters who stray from the path of typical reading acquisition often are not distinguishable from other children who are classified as poor readers rather than as learning disabled This model is an especially useful one for practitioners because it both provides a broader view of reading disability than have many previous models and shows how reading disability relates to typical reading acquisition Using illustrative case studies the authors describe the four patterns of reading disability explain how to properly assess them and suggest ways to conquer them
