Projects Guide for ROBOTIS ENGINEER Chi N. Thai, 2020-09-30. This book is written to help users to further utilize the capabilities of the ROBOTIS ENGINEER Kits 1 and 2. Each chapter showcases one robot type starting in Volume 1 with the SimpleBot with Arms and progressing towards more sophisticated robots in later chapters and into Volume 2 due end of 2021. Furthermore, within each chapter, the programming tool environment used also progresses from simple like TASK MOTION and MicroPython on the CM 550 to more sophisticated and enabling tools such as standard Python and C on a Windows PC. In a way, this book is configurable, whereas a user unfamiliar with C or Python can just stay with the TASK path from one chapter to the next, while a more experienced programmer would choose a C or Python path instead. Other users may choose or design their personal paths depending on their current skill levels and target goals. The goals of Volume 1 are to establish the foundational robotics concepts and programming techniques for the ENGINEER System using two demonstration robots. oThe Simple Bot with Arms is used to illustrate the basic operations of a purely jointed robot using Dynamixel's configured in Position Control. oThe Pan Tilt Commando is used to illustrate the basic operations of a mixed control robot that has some Dynamixel's configured in Position Control mode and some Dynamixel's configured in Velocity Control mode. For each robot, multiple projects will be showcased: first in TASK codes, then the same projects are re-coded in MicroPython so that readers can appreciate the translation requirements and subtleties. Programming features of the CM 550 will be combined with synergistic features from the ENGINEER Mobile App and the

RPi0W with Pi Camera The same projects will also be reviewed and revised by adding the Standard Python and C features available at the Desktop PC levels such as the OpenCV and Boost Asio libraries as well as the PySerial tool These projects also showcase the under utilized ROBOTIS Remocon Packet Protocol to control up to two robots simultaneously using ZigBee and Bluetooth communications hardware
